

DIN EN 12707:2009-12 (E)

Plastics drums - Non-removable head (tight head) drums with a nominal capacity of 210 l and 225 l

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Terms and definitions	4
4	Requirements	5
4.1	Dimensions	5
4.2	Drum mass	5
4.3	Material identification symbol	5
4.4	Closures	5
4.5	Materials	5
4.6	Handling	5
4.7	Stacking	5
4.8	Draining	5
4.9	Finish	6
5	Designation	6
Annex A (normative) Capacity measurement method for non-removable head (tight head) plastics drums		8
A.1	Principle	8
A.2	Apparatus	8
A.3	Procedure for determination of total capacity	8
A.4	Procedure for determination of brimful capacity	9
A.5	Expression of results	9
Annex B (normative) Draining test method for non-removable head (tight head) plastics drums		10
B.1	Principle	10
B.2	Apparatus	10
B.3	Determination of drainability using the top section of the drum (procedure A)	10
B.4	Determination of drainability using a complete drum (procedure B)	10
B.5	Expression of results	11
