

DIN EN ISO 16495:2013-12 (E)

Packaging - Transport packaging for dangerous goods - Test methods (ISO 16495:2013)

Contents	Page
Foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Test report	6
5 Selection and preparation of packaging, IBCs and large packaging for testing	6
5.1 Selection of packaging, IBCs and large packaging	6
5.2 Information to be provided with packaging, IBCs and large packaging	6
5.3 Selection of contents and filling of packaging, IBCs and large packaging prior to testing ...	7
5.4 Closing packaging, IBCs and large packaging	9
5.5 Check of design type specification with requirements	10
5.6 Conformity check of test samples with design type specification	10
6 Test methods	11
7 Facilities for testing	11
7.1 General requirements	11
7.2 Accuracy of measurement equipment	11
7.3 Accuracy of measurements in testing	12
7.4 Climatic conditions	12
Annex A (normative) Test report	13
Annex B (normative) Packaging specifications	15
Annex C (normative) IBC specifications	26
Annex D (normative) Large packaging specifications	33
Annex E (informative) Type of contents	36
Annex F (normative) Drop test	37
Annex G (normative) Leakproofness test	40
Annex H (normative) Hydraulic pressure test	42
Annex I (normative) Stacking test	44
Annex J (normative) Water spray test	48
Annex K (normative) Bottom lift test	49
Annex L (normative) Top lift test	50

Annex M (normative) Tear test	51
Annex N (normative) Topple test	52
Annex O (normative) Righting test	53
Annex P (normative) Puncture test	54
Annex Q (normative) Vibration test	55
Bibliography	56
