## Packaging and the environment - Processes for chemical recovery

---

| <b>Contents</b>   |  | <b>Page</b> |
|---|--|-------------|
| Foreword .....  |  | iv          |
| Introduction .....  |  | v           |
| 1 Scope .....   |  | 1           |
| 2 Normative references .....  |  | 1           |
| 3 Terms and definitions .....   |  | 1           |
| 4 Inventory of relevant existing documents .....  |  | 2           |
| 5 Identification of further packaging-specific needs related to chemical recovery .....       |  | 2           |
| 6 Suitability for chemical recovery process .....   |  | 2           |
| Annex A (informative) Examples of monomer recovery of PET .....                               |  | 4           |
| Annex B (informative) An example of oil recovery .....  |  | 6           |
| Annex C (informative) An example of gas recovery .....  |  | 7           |
| Annex D (informative) An example of reduction agent in blast furnaces .....                   |  | 8           |
| Annex E (informative) An example of raw material for coke manufacturing .....                 |  | 9           |
| Annex F (informative) Assessment checklist -- suitability for chemical recovery process ..... |  | 10          |
| Bibliography .....  |  | 11          |
