DIN 55415:2022-09 (E nglisch)

Transport stability - Test methods to determine the transport stability of unit loads in intermodal transportation

Contents

Page

Foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Normative references ... 6

3 Terms and definitions ... 6

4 Requirements, test methods and evaluation ... 8
4.1 General requirements ... 8
4.2 Test methods ... 9
4.3 Evaluation ... 11

5 Procedure ... 12

6 Marking ... 14

7 Test report ... 14

Annex A (normative) **Dynamic laboratory test** ... 16
A.1 Equipment/testing device ... 16
A.1.1 General ... 16
A.1.2 Acceleration/deceleration measuring device ... 16
A.2 Machine settings ... 17

Annex B (informative) **Figures of dynamic laboratory tests** ... 18

Annex C (informative) **Figures of static inclination tests** ... 19
C.1 Static inclination test along the lines of DIN EN 12195-1:2021-01 and DIN EN 12642:2017-03 ... 19
C.2 Static inclination test — Testing the stability of the handling unit ... 20

Bibliography ... 22

Figures

Figure 1 — Tilt angle over lifting time — Evaluation of measurements on different versions of tilting tables of different users ... 11

Figure 2 — Percentage of kinetic energy as a function of test duration ... 13

Figure 3 — Dynamic test speed as a function of the required test duration ... 13

Figure A.1 — Example: Acceleration/deceleration curve of a dynamic deceleration test ... 17

Figure B.1 — Sketch of the principle of a testing device for dynamic laboratory testing with inclination of the track ... 18

Figure B.2 — Sketch of the principle of a testing device for dynamic laboratory testing with horizontal arrangement ... 18

Figure C.1 — Example of the inclination of a test piece by an angle of $\alpha = 27°$ 19

Figure C.2 — Sketch of the principle of a tilting table 19

Figure C.3 — Sketch of the principle of a hexapod 20

Figure C.4 — Handling unit without aids for unit load securing (i.e. removal of top protection, edge protection, stretch film, shrink film, etc.) 20

Figure C.5 — Minimum requirement for the angle of inclination $\alpha = 10°$ of a handling unit (see 4.1) 21

Tables

Table 1 — Transport stability classes (TK) 9

Table 2 — Dynamic driving tests with the driving cycles according to DIN EN 12642:2017-03, Annex B, to determine the transport stability class 10
