

# DIN 55415:2022-09 (E nglisch)

## Transport stability - Test methods to determine the transport stability of unit loads in intermodal transportation

---

<b>Contents</b>	<b>Page</b>
Foreword .....	4
Introduction .....	5
1 Scope .....	6
2 Normative references .....	6
3 Terms and definitions.....	6
4 Requirements, test methods and evaluation.....	8
4.1 General requirements .....	8
4.2 Test methods .....	9
4.3 Evaluation.....	11
5 Procedure .....	12
6 Marking .....	14
7 Test report.....	14
Annex A (normative) Dynamic laboratory test.....	16
A.1 Equipment/testing device .....	16
A.1.1 General .....	16
A.1.2 Acceleration/deceleration measuring device.....	16
A.2 Machine settings.....	17
Annex B (informative) Figures of dynamic laboratory tests.....	18
Annex C (informative) Figures of static inclination tests.....	19
C.1 Static inclination test along the lines of DIN EN 12195-1:2021-01 and DIN EN 12642:2017-03.....	19
C.2 Static inclination test — Testing the stability of the handling unit.....	20
Bibliography .....	22

## Figures

Figure 1 — Tilt angle over lifting time — Evaluation of measurements on different versions of tilting tables of different users.....	11
Figure 2 — Percentage of kinetic energy as a function of test duration .....	13
Figure 3 — Dynamic test speed as a function of the required test duration .....	13
Figure A.1 — Example: Acceleration/deceleration curve of a dynamic deceleration test.....	17
Figure B.1 — Sketch of the principle of a testing device for dynamic laboratory testing with inclination of the track.....	18
Figure B.2 — Sketch of the principle of a testing device for dynamic laboratory testing with horizontal arrangement.....	18

<b>Figure C.1 — Example of the inclination of a test piece by an angle of <math>\alpha = 27^\circ</math> .....</b>	<b>19</b>
<b>Figure C.2 — Sketch of the principle of a tilting table .....</b>	<b>19</b>
<b>Figure C.3 — Sketch of the principle of a hexapod .....</b>	<b>20</b>
<b>Figure C.4 — Handling unit without aids for unit load securing (i.e. removal of top protection, edge protection, stretch film, shrink film, etc.).....</b>	<b>20</b>
<b>Figure C.5 — Minimum requirement for the angle of inclination <math>\alpha = 10^\circ</math> of a handling unit (see 4.1).....</b>	<b>21</b>

## **Tables**

<b>Table 1 — Transport stability classes (TK) .....</b>	<b>9</b>
<b>Table 2 — Dynamic driving tests with the driving cycles according to DIN EN 12642:2017-03, Annex B, to determine the transport stability class .....</b>	<b>10</b>
