

ISO 4427-1:2007-08 (E)

Plastics piping systems - Polyethylene (PE) pipes and fittings for water supply - Part 1: General

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions, symbols and abbreviated terms	3
3.1	Terms and definitions	3
3.2	Symbols	6
3.3	Abbreviated terms	6
4	Material	7
4.1	Compound	7
4.2	Colour	7
4.3	Use of reprocessible and recyclable material	7
4.4	Physical characteristics of the compound	7
4.5	Fusion compatibility	9
4.6	Classification and designation	10
5	Effect on water quality of pipes intended for conveyance of water for human consumption	10
Annex A (informative) Pressure reduction coefficients		11
Annex B (informative) Resistance to rapid crack propagation		12
Bibliography		14
