Hydrometry - Measuring the water level in a well using automated pressure transducer methods

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Applications of the use of pressure transducers to ground-water resource investigations	1
4.1	Ground-water monitoring	1
4.2	Long-term monitoring	2
4.3	Short-term monitoring	4
4.4	Reducing well-bore storage	4
5	Planning considerations for sensor systems	8
5.1	General	8
5.2	Study duration and system reliability	8
5.3	Required accuracy	8
5.4	Installation location and site accessibility	9
5.5	System components and compatibility	9
5.6	Water quality	9
5.7	Number of wells	9
5.8	Well location, diameter and depth	10
5.9	Data-collection frequency	10
5.10	Data transfer	11
5.11	Cost	11
6	Assembly, calibration and testing	11
6.1	General	11
6.2	Familiarization with transducer performance	11
6.3	Linear transducer calibration	13
6.4	Sources of error in linear calibrations	14
6.5	Temperature-corrected transducer calibration	14
7	Installation	16
7.1	General	16
7.2	Care and handling	17
7.3	Shelter	18
7.4	Power requirements	19
7.5	Hanging transducers in wells	20
7.6	Measuring system drift	22
7.7	Desiccation systems	23
7.8	Transducer field calibration	23
7.9	Optimizing measurement-system performance	26
8	Data collection	27
8.1	General	27
8.2	Frequency of visits	27

8.3	Field checks	27
8.4	Data recording and retrieval	28
8.5	Verification	30
8.6	Use with data loggers	30
8.7	Field documentation	30
8.8	Maintenance	30
9	Data processing	31
9.1	General	31
9.2	Adjustments	31
9.3	Documentation	31
Annex A (informative) Pressure transducers -- Characterization, common problems and solutions		33
A.1	Pressure transducer characterization	33
A.1.1	General	33
A.1.2	Types of pressure measurements	33
A.1.3	Common pressure units used in hydrology	34
A.1.4	Basic types of transducers for measuring pressure	35
A.1.5	Understanding pressure-transducer specifications	47
A.2	Common problems and solutions	53
A.2.1	General	53
A.2.2	Leakage	53
A.2.3	Open and short circuits	55
A.2.4	Grounding problems	56
A.2.5	Diaphragm failure	56
A.2.6	Power-supply failure	56
A.2.7	Data logger channel failure	56
A.2.8	Voltage surges	57
A.2.9	Faulty shielding	57
A.2.10	Over-range problems	57
