ISO 11277:2009-09 (E)

Soil quality - Determination of particle size distribution in mineral soil material - Method by sieving and sedimentation

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terminology and symbols 2

4 Principle 2

5 Field sampling 4

6 Sample preparation 4

7 Dry sieving (material > 2 mm) 4

8 Wet sieving and sedimentation (material < 2 mm) 7

9 Precision 20

10 Test report 21

Annex A (normative) Determination of particle size distribution of mineral soil material that is not dried prior to analysis 22

Annex B (normative) Determination of particle size distribution of mineral soils by a hydrometer method following destruction of organic matter 25
