DIN EN 16039:2011-12 (E)

Water quality - Guidance standard on assessing the hydromorphological features of lakes

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 7

4 Principle 12

5 Survey requirements 12
5.1 Lake `types' 12
5.2 Scale 15
5.2.1 General 15
5.2.2 Dividing the lake system into zones for hydromorphological assessment 15
5.2.3 Catchment scale 15
5.3 Reference conditions 15
5.3.1 General 15
5.3.2 Lake water balance and hydrological regime 16
5.3.3 Lake morphometry 16
5.3.4 Shore and lake bed character 16
5.3.5 Hydromorphological connectivity and biological continuity 16
5.3.6 Terrestrial and aquatic vegetation 16

6 Features for survey and assessment 17
6.1 Features and attributes 17
6.2 Feature recording related to purpose and method of data gathering 17
6.3 A framework for acquiring lake hydromorphology data 17
6.4 Hydromorphological pressure assessment 20
6.4.1 General 20
6.4.2 Classes of engineering and activity pressures 20
6.5 Timing and frequency of hydromorphological assessments 23
6.6 Lake characterisation 23
6.6.1 General 23
6.6.2 Field sampling 23
6.6.3 Bathymetry 23
6.6.4 Water column and lake bed characterisation at an Index Site 23
6.6.5 Shore zone assessments 24
6.6.6 Lake site activities/pressures 24
6.6.7 Hydrology 24
6.6.8 Sedimentology 25

7 Reporting hydromorphological assessment and classification 25
7.1 General 25
7.2 Data presentation 25

8 Training and quality assurance for survey and assessment 26
8.1 General 26
8.2 Training manuals 27

8.3 Data entry and validation 27

Annex A (informative) Common European lake types defined by mode of formation 28

Annex B (informative) Lake shore and bottom natural and artificial substrates 29

Annex C (informative) Definitions and formulae for lake morphometric parameters 30

Annex D (informative) Equipment required for a field-based hydromorphological survey 32

Annex E (informative) Checklist of factors relevant to assessing hydrological regime 33

Annex F (informative) Explanatory account of the Lake Habitat Survey (LHS) method 34

Annex G (informative) Remote sensing and GIS for lake hydromorphology data capture 36

Bibliography 37
