|-----------------------|---|-------------|
| Foreword .....        |   | 3           |
| Introduction .....    |   | 4           |
| 1                     | Scope .....   | 5           |
| 2                     | Normative references .....  | 5           |
| 3                     | Terms and definitions .....   | 5           |
| 4                     | Pollution of potable water : general observations .....                                     | 7           |
| 4.1                   | Backflow of used water .....  | 7           |
| 4.2                   | Connection .....  | 7           |
| 4.3                   | External influences .....   | 8           |
| 4.4                   | Materials .....   | 8           |
| 4.5                   | Stagnation .....  | 8           |
| 4.6                   | Harm caused by inadequate or improper maintenance .....                                     | 8           |
| 5                     | Analysis method of the risks at the point of use and choice of protection .....             | 8           |
| 5.1                   | General remarks .....   | 8           |
| 5.2                   | Determination of fluid categories which are or could be in contact with potable water ..... | 9           |
| 5.3                   | Determination of the installation characteristics .....                                     | 10          |
| 5.4                   | Separation by single or double walls .....  | 10          |
| 5.5                   | Air break to drain .....  | 11          |
| 5.6                   | Installation matrix .....   | 11          |
| 5.7                   | Protection units .....  | 11          |
| 5.8                   | Matrix of the protection units appropriate to fluid categories .....                        | 13          |
| 6                     | Point of use protection for equipment at the draw-off point for domestic uses .....         | 15          |
| 6.1                   | Choice of the protection units to be implemented .....                                      | 15          |
| 6.2                   | Location of the protection units .....  | 15          |
| 7                     | Point of use protection of particular equipment for non domestic uses .....                 | 15          |
| 8                     | Protection at the connection point to the public potable water system .....                 | 15          |
| 9                     | Air break to drain .....  | 15          |
| Annex A (normative)   | Reference list of the protection units .....  | 17          |
| Annex B (informative) | Guide table for determining the fluid category from which protection is required .....      | 48          |
| Annex C (informative) | Summary of the analysis method .....  | 50          |
| Bibliography .....    |   | 51          |
