

DIN EN ISO 25177:2011-09 (E)

Soil quality - Field soil description (ISO 25177:2008)

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	General references	6
3.1	Site/profile numbers	6
3.2	Location	6
3.3	Geographical coordinates	7
3.4	Date of observation	7
3.5	Author and organization	7
4	Profile environment	7
4.1	Previous precipitation	7
4.2	Land use at plot level (checked by detailed field survey)	8
4.3	Type of cultivation or vegetation or human utilization (at the plot level)	8
4.4	Geomorphology of the site	9
4.5	Slope length (in metres)	9
4.6	Slope value	9
4.7	Orientation (aspect) of the slope	9
4.8	Nature of the parent material	9
4.8.1	Modified or artificial material	9
4.8.2	Natural material	9
4.9	Presence and depth of water table	10
4.9.1	General	10
4.9.2	Depth	10
4.9.3	Minimum depth of water table	10
4.9.4	Maximum depth of water table	10
4.9.5	Nature of the water	11
5	Surface appearance	11
5.1	Percentage of land surface occupied by rock outcrops or surface exposures of "non-natural" material (e.g. on an industrial site)	11
5.2	Evidence of erosion	11
6	General designation - Soil type	12
6.1	General	12
6.2	Type of soil classification used	12
6.3	Soil type with reference to the soil classification used	12
6.4	Type of horizon designation used	12
6.5	Sequence of horizons	12
7	Horizon or layer description	12
7.1	General	12
7.2	Horizon or layer number	13
7.3	Depth	13
7.4	Estimation of moisture status	13
7.5	Colour of the horizon or layer matrix	14
7.6	Mottles	14

7.6.1	General	14
7.6.2	Abundance	14
7.6.3	Colour	15
7.7	Estimated organic matter content	15
7.8	Texture	15
7.8.1	Description of texture diagram	15
7.8.2	Estimation	15
7.9	Coarse elements	15
7.9.1	General	15
7.9.2	Abundance (in percent volume fraction)	15
7.9.3	Maximum size of the most frequently observed coarse elements	16
7.9.4	Nature	16
7.10	Carbonates and effervescence	16
7.10.1	Intensity of effervescence	16
7.10.2	Location of effervescence	17
7.11	Main categories of structure	17
7.12	Compactness	18
7.13	Total estimated porosity	18
7.14	Roots	19
7.14.1	Size (diameter) of most frequently observed roots	19
7.14.2	Abundance	19
7.15	Density of worm channels (usually an average over a number of square decimetres)	19
7.16	Nature of lower horizon boundary	19
Annex A (informative) Charts for estimating proportions of mottles, coarse elements, etc		21
Annex B (informative) Reference soil groups of the World Reference Base for soil resources (FAO, ISRIC and ISSS, 2006)		22
Annex C (informative) Soil horizon designation -- Example of the FAO System (2006)		28
Annex D (informative) Examples of texture diagrams		33
Annex E (informative) Determination of soil texture in the field		36
Annex F (informative) Some types of soil structure		39
Bibliography		40
