

ISO 11262:2011-11 (E)

Soil quality - Determination of total cyanide

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
4.1	Direct liberation of hydrogen cyanide using orthophosphoric acid	2
4.2	Determination of total cyanide content	2
5	Reagents	2
5.1	Reagents for liberation and absorption of cyanide	2
5.2	Reagents for the photometric determination of cyanide	3
5.3	Reagents for the titrimetric determination of cyanide	3
6	Apparatus	4
7	Sample preservation and preparation	5
7.1	Sample preservation	5
7.2	Sample preparation	5
8	Direct liberation using orthophosphoric acid	6
8.1	Procedure	6
8.2	Blank test	6
9	Determination of cyanide -- Photometric method	7
9.1	Applicability	7
9.2	Procedure	7
9.3	Preparation of the calibration graph	7
9.4	Calculation	7
10	Determination of cyanide -- Titrimetric method using an indicator	8
10.1	Applicability	8
10.2	Procedure	8
10.3	Calculation	9
11	Expression of results	9
12	Precision	10
13	Test report	10
Annex A (informative)	Precision data	11
Annex B (informative)	Extraction with sodium hydroxide solution and subsequent liberation using orthophosphoric acid	12

Annex C (informative) Comparison of the direct liberation of total cyanide and sodium hydroxide extraction with subsequent liberation	15
Bibliography	16
