Soil quality - Determination of the effects of pollutants on soil flora - Part 1: Method for the measurement of inhibition of root growth

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	Test plants	3
6	Materials	3
6.1	Test vessels	3
6.2	Soil	3
7	Equipment	5
8	Reference substance	5
9	Procedure	5
9.1	Experimental design	5
9.2	Preparation of pots	6
9.3	Pregermination of the seeds	6
9.4	Growing conditions	6
9.5	Test duration	6
9.6	Measurements	7
10	Expression of results and data	7
11	Validity criteria	7
12	Test report	7
Annex A (informative) Recommended method for measuring the water-holding capacity of the soil ..		9
Annex B (informative) Results of tests performed on reference substances		10
Annex C (informative) Example of results obtained with boric acid using sand as the substrate		11
Annex D (informative) Recommended methods for the incorporation of chemicals into soils		12
Annex E (informative) Recommended methods for the incorporation of compost, sludge or waste into soils		13
Annex F (informative) Example of seedlings of winter barley collected at the end of the test after removal from artificial soil		15
Bibliography		16
