ISO 13160:2012-07 (E)

Water quality - Strontium 90 and strontium 89 - Test methods using liquid scintillation counting or proportional counting

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Symbols,definitions,andunits 1

4 Principle 2
4.1 General 2
4.2 Chemical separation 2
4.3 Detection 3

5 Chemical reagents and equipment 3

6 Procedure 3
6.1 Test sample preparation 3
6.2 Chemical separation 3
6.3 Preparation of the source for test 5
6.4 Measurement 6

7 Expression of results 8
7.1 Determination of 90Sr in equilibrium with 90Y 8
7.2 Determination of 90Sr by ingrowth of 90Y 9
7.3 Determination of 90Sr in presence of 89Sr when 90Sr is in equilibrium with 90Y 11
7.4 Confidencelimits 14

8 Quality control 14

9 Test report 15

Annex A (informative) Determination of 89Sr and 90Sr by precipitation and proportional counting ..16

Annex B (informative) Determination of 89Sr and 90Sr by precipitation and liquid scintillation counting20 Annex C (informative) Determination of 90Sr from its daughter product 90Y at equilibrium by organic extraction and liquid scintillation counting 24

Annex D (informative) Determination of 90Sr after ionic exchange separation by proportional counting26 Annex E (informative) Determination of 90Srafterseparationonacrownetherspecificresinandliquid scintillation counting 29

Annex F (informative) Determination of 90Sr from its daughter product 90Y at equilibrium by organic extraction by proportional counting 31

Annex G (informative) Correction factor for purity control using proportional counting 35
