ISO 6341:2012-10 (E)

Water quality - Determination of the inhibition of the mobility of Daphnia magna Straus (Cladocera, Crustacea) - Acute toxicity test

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 2

5 Test environment 2

6 Reagents, test organisms and media 3

7 Apparatus and materials 4

8 Treatment and preparation of samples 5
8.1 Specialprecautionsforsampling,transportation,storageandtreatmentofwater,effluent,or aqueous extract samples to be tested 5
8.2 Preparation of solutions of substances to be tested 6

9 Procedure 6
9.1 General 6
9.2 Preliminary test 7
9.3 Definitivetest 7
9.4 Check of the sensitivity of the Daphnia magna and conformity with the procedure 7
9.5 Limit test 8

10 Interpretation and validity of the results 8
10.1 Estimation of the EC50 8
10.2 Validity criteria 8

11 Expression of results 8

12 Test report 8

Annex A (informative) Preparation of the Elendt M4 medium 10

Annex B (informative) Example of graphical determination of the inhibition of mobility of Daphnia magnabyaneffluentorstocksolutionofasubstanceataconcentrationof1000mg/l 13

Annex C (informative) General recommendations for stock culturing 16

Annex D (informative) Culturing of Daphnia magna for production of dormant eggs 17

Annex E (informative) Precision data 19

Annex F (informative) Dilution level D -- Preparation of the dilution series for the determination of the LID 20
