|--------------------------------------------------------------------------------------------------------------------|-----------|
| Foreword.....                                                                                                      | 4         |
| <b>1 Scope.....</b>                                                                                                | <b>5</b>  |
| <b>2 Normative references.....</b>                                                                                 | <b>5</b>  |
| <b>3 Terms and definitions.....</b>                                                                                | <b>6</b>  |
| <b>4 Reference conditions.....</b>                                                                                 | <b>6</b>  |
| <b>5 Symbols, units and equations.....</b>                                                                         | <b>7</b>  |
| <b>6 External examination.....</b>                                                                                 | <b>7</b>  |
| 6.1 General.....                                                                                                   | 7         |
| 6.2 Object of the examination.....                                                                                 | 7         |
| 6.3 Preparation.....                                                                                               | 7         |
| 6.4 Examination procedures.....                                                                                    | 8         |
| <b>7 Performance tests for all water meters.....</b>                                                               | <b>12</b> |
| 7.1 General.....                                                                                                   | 12        |
| 7.2 Required conditions for all tests.....                                                                         | 12        |
| 7.3 Static pressure test (ISO 4064-1:2014 OIML R 49-1:2013, 4.2.10).....                                           | 13        |
| 7.4 Determination of intrinsic errors (of indication) (ISO 4064-1:2014 OIML R 49-1:2013, 7.2.3).....               | 14        |
| 7.5 Water temperature test (ISO 4064-1:2014 OIML R 49-1:2013, 4.2.8).....                                          | 22        |
| 7.6 Overload water temperature test (ISO 4064-1:2014 OIML R 49-1:2013, 7.2.5).....                                 | 22        |
| 7.7 Water pressure test (ISO 4064-1:2014 OIML R 49-1:2013, 4.2.8).....                                             | 23        |
| 7.8 Reverse flow test (ISO 4064-1:2014 OIML R 49-1:2013, 4.2.7).....                                               | 23        |
| 7.9 Pressure loss test (ISO 4064-1:2014 OIML R 49-1:2013, 6.5).....                                                | 25        |
| 7.10 Flow disturbance tests (ISO 4064-1:2014 OIML R 49-1:2013, 6.3.4).....                                         | 30        |
| 7.11 Durability tests (ISO 4064-1:2014 OIML R 49-1:2013, 7.2.6).....                                               | 30        |
| 7.12 Magnetic field testing.....                                                                                   | 35        |
| 7.13 Tests on ancillary devices of a water meter.....                                                              | 35        |
| 7.14 Environmental testing.....                                                                                    | 36        |
| <b>8 Performance tests related to influence factors and disturbances.....</b>                                      | <b>36</b> |
| 8.1 General requirements (ISO 4064-1:2014 OIML R 49-1:2013, A.1).....                                              | 36        |
| 8.2 Dry heat (non-condensing) (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                         | 40        |
| 8.3 Cold (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                                              | 41        |
| 8.4 Damp heat, cyclic (condensing) (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                    | 42        |
| 8.5 Power supply variation (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                            | 43        |
| 8.6 Vibration (random) (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                                | 46        |
| 8.7 Mechanical shock (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                                  | 47        |
| 8.8 AC mains voltage dips, short interruptions and voltage variations (ISO 4064-1:2014 OIML R 49-1:2013, A.5)..... | 48        |
| 8.9 Bursts on signal lines (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                            | 49        |
| 8.10 Bursts (transients) on AC and DC mains (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                           | 51        |
| 8.11 Electrostatic discharge (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                          | 52        |
| 8.12 Radiated electromagnetic fields (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                  | 53        |
| 8.13 Conducted electromagnetic fields (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                                 | 55        |
| 8.14 Surges on signal, data and control lines (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                         | 57        |
| 8.15 Surges on AC and DC mains power lines (ISO 4064-1:2014 OIML R 49-1:2013, A.5).....                            | 58        |
| 8.16 Static magnetic field (ISO 4064-1:2014 OIML R 49-1:2013, 7.2.8).....                                          | 59        |
| 8.17 Absence of flow test.....                                                                                     | 60        |

|           |                                                                                                                                                 |            |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>9</b>  | <b>Test program for type evaluation</b> .....                                                                                                   | <b>61</b>  |
| 9.1       | Number of samples required.....                                                                                                                 | 61         |
| 9.2       | Performance test applicable to all water meters.....                                                                                            | 61         |
| 9.3       | Performance tests applicable to electronic water meters, mechanical water meters fitted with electronic devices, and their separable parts..... | 62         |
| 9.4       | Type evaluation of separable parts of a water meter.....                                                                                        | 62         |
| 9.5       | Families of water meters.....                                                                                                                   | 63         |
| <b>10</b> | <b>Tests for initial verification</b> .....                                                                                                     | <b>63</b>  |
| 10.1      | Initial verification of complete and combined water meters.....                                                                                 | 63         |
| 10.2      | Initial verification of separable parts of a water meter.....                                                                                   | 64         |
| <b>11</b> | <b>Presentation of results</b> .....                                                                                                            | <b>65</b>  |
| 11.1      | Object of the reports.....                                                                                                                      | 65         |
| 11.2      | Identification and test data to be included in records.....                                                                                     | 65         |
|           | <b>Annex A (normative) Type examination and testing of checking facilities of electronic devices</b> .....                                      | <b>67</b>  |
|           | <b>Annex B (normative) Calculating the relative error (of indication) of a water meter</b> .....                                                | <b>73</b>  |
|           | <b>Annex C (normative) Installation requirements for flow disturbance tests</b> .....                                                           | <b>79</b>  |
|           | <b>Annex D (normative) Type evaluation of a family of water meters</b> .....                                                                    | <b>81</b>  |
|           | <b>Annex E (informative) Examples of methods and components used for testing concentric water meters</b> .....                                  | <b>83</b>  |
|           | <b>Annex F (informative) Determining the density of water</b> .....                                                                             | <b>86</b>  |
|           | <b>Annex G (informative) Maximum uncertainties in the measurement of influence factors and disturbances</b> .....                               | <b>88</b>  |
|           | <b>Annex H (informative) Pressure loss test pressure tappings, hole and slot details</b> .....                                                  | <b>91</b>  |
|           | <b>Annex I (normative) Flow disturbers</b> .....                                                                                                | <b>94</b>  |
|           | <b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2004/22/EC</b> .....       | <b>105</b> |
|           | <b>Bibliography</b> .....                                                                                                                       | <b>106</b> |
