DIN EN ISO 16665:2014-06 (E)

Water quality - Guidelines for quantitative sampling and sample processing of marine soft-bottom macrofauna (ISO 16665:2014)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Terms and definitions 5
2.1 Ecological or biological concepts 6
2.2 Surveys and samples 6

3 Strategies and objectives for soft-bottom faunal surveys 7
3.1 Sampling programme and plan 7
3.2 Positioning of sampling stations 7
3.3 Reference stations 9
3.4 Types of survey 9
3.5 Change in sampling programme and intercalibration 12

4 Sampling 12
4.1 Documentation and field log 12
4.2 Sampling and sample processing in the field 14
4.3 Sample fixation 17
4.4 Background environmental descriptors 18

5 Sample processing in the laboratory 21
5.1 Sorting 21
5.2 Sample residue 22

6 Taxon determination and quantification 22
6.1 Level of identification and taxon lists 22
6.2 Quantification 23
6.3 Reference collection 23
6.4 Biomass 24
6.5 Data reporting 24
6.6 Storage and archiving 24

7 Quality assurance and quality control 25
7.1 General 25
7.2 Auditing 25
7.3 Equipment calibration and operating safety 25
7.4 Training 26
7.5 Checklists, sample log and anomaly reporting 26
7.6 Quality of sample sorting 26
7.7 Quality of taxon identification 26
7.8 Identification literature 27
7.9 Reference and collection 27

Annex A (informative) Sampling devices 28

Annex B (informative) Processing of samples with live specimens 33

Annex C (informative) Biomass measurements 34

Annex D (informative) Processing particularly large samples 36

Bibliography 37
