DIN EN 15910:2014-07 (E)

Water quality - Guidance on the estimation of fish abundance with mobile hydroacoustic methods

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms, definitions, symbols and abbreviated terms 6
3.1 Terms and definitions 6
3.2 Symbols and abbreviated terms 6

4 Principle and field of application 7

5 Equipment 8
5.1 General 8
5.2 System performance 8
5.2.1 Minimum requirements 8
5.2.2 Optimum requirements 9
5.3 Calibration 9
5.3.1 General 9
5.3.2 Types of calibration 9

6 Survey design 11
6.1 General 11
6.2 Design for appropriate resolution and detection 11
6.3 Pre-planning 11
6.4 Timing of surveys 12
6.5 Transducer orientation and position 13
6.5.1 General 13
6.5.2 Requirements specific to vertical surveys 13
6.5.3 Requirements specific to horizontal surveys 14
6.6 Requirements for acoustic inter-comparisons 14

7 Survey data acquisition 14
7.1 Acoustic data 14
7.2 Echosounder settings 15
7.3 Data acquisition from additional equipment 15

8 Post-processing of acoustic data 16
8.1 General 16
8.2 Pre-analysis 16
8.2.1 Bottom detection 16
8.2.2 Discrimination 16
8.2.3 Single Echo/Target Detection (SED/ST) scenarios 18
8.3 Analysis 19
8.3.1 Abundance estimate methods 19
8.3.2 Vertical surveys 19
8.3.3 Horizontal Surveys 19
8.3.4 Biomass estimates 19

9 Calculation of Results 20
9.1 Aim 20
9.2 Identification of targets 20
9.3 Interpretation of Target Strength data 21
9.4 Determination of weight and biomass 21
9.5 Outputs of acoustic data 22
9.5.1 Fish abundance as numerical density 22
9.5.2 Size structure 22
9.5.3 Biomass 23
9.6 Estimates of sampling variance and precision 23
9.6.1 Precision of estimates 23
9.6.2 Simple Random Analysis 23
9.6.3 Stratified Analysis 23

10 Quality control and quality assurance 25
10.1 General 25
10.2 Quality control 25
10.3 Quality assurance 25

11 Survey report 25
11.1 General 25
11.2 Objectives, sampling location and staff 25
11.3 Equipment and prerequisites 26
11.4 Track details, site details and conditions 26
11.5 Survey results 27

Annex A (informative) Supplementary data 29

Annex B (informative) Methods for estimates of fish abundance 31

Annex C (informative) Interpretation of TS into fish length and weight 32

Annex D (informative) Deconvolution procedure 37

Annex E (informative) Determination of the Elementary Distance Sampling Unit (EDSU) 39

Annex F (informative) Estimates of sampling variance and precision 40

Annex G (informative) Published inter-comparison studies 41

Bibliography 43
