ISO 13913:2014-02 (E)

Soil quality - Determination of selected phthalates using capillary gas chromatography with mass spectrometric detection (GC/ MS)

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Principle 2

4 Interferences 2
4.1 General 2
4.2 Interferences during sampling 2
4.3 Cross contamination 2
4.4 Interferences in gas chromatography 2

5 Reagents 2
5.1 General 2

6 Apparatus 4
6.1 General 4

7 Sampling and sample storage 6

8 Procedure 6
8.1 Preparation of glass apparatus 6
8.2 Drying of the sample 6
8.3 Extraction 7
8.4 Clean-up 7
8.5 Gas chromatography 8
8.6 Blank monitoring 8
8.7 Identification of individual compounds 8

9 Calibration 9
9.1 General 9
9.2 Calibration with internal standard 9
9.3 Verification of calibration 10

10 Calculation 11

11 Expression of results 12

12 Precision 12

13 Test report 12

Annex A (informative) Repeatability and reproducibility data 13

Annex B (informative) Example of a reference solution for multipoint calibration 16

Annex C (informative) Examples for gas chromatographic conditions 18

Annex D (informative) Flow scheme of the determination of phthalates 20

Bibliography 21
