DIN EN ISO 18772:2014-07 (E)

Soil quality - Guidance on leaching procedures for subsequent chemical and ecotoxicological testing of soils and soil materials (ISO 18772:2008)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 General approach 7
4.1 Aim of leaching tests 7
4.2 How to choose leaching tests 8
4.3 Usefulness of leaching tests to understand and characterise different mechanisms occurring in soil 11

5 Case 1: Application of leaching tests to determine the leaching behaviour of soil in the framework of impact assessment 12
5.1 Presentation and description of the assessment methodology 12

6 Case 2: Compliance and comparison purposes 17

7 Description of test methods 18
7.1 Laboratory methods for basic characterisation and compliance/quality control testing 18
7.2 Large-scale columns and lysimeter 29

8 Example: how to use leaching test results to assess the impact of soil on groundwater 30
8.1 General 30
8.2 Use of leaching behaviour determination in subsequent transfer and impact assessment 31

Annex A (informative) Schematic representation of a contaminated site with relevant targets 32

Annex B (informative) Comparison at different scales of testing (laboratory, lysimeter and field scale) 33
