

DIN 19627:1993-03 (E)

Ozone generation plants for the treatment of water

Contents		Page
1	Field of application	3
2	Scope	3
3	General	3
4	Terms and definitions	3
4.1	Ozonizer	3
4.2	Ozone generator	3
4.3	Ozone generation plant	3
4.4	Ozonation plant	3
5	Characteristic features of ozone generation plants	3
5.1	Design of ozone generation plants	3
5.2	Design of ozonizers	4
5.3	Working pressure	4
5.4	Operating frequencies	4
5.5	Operating gas	4
5.6	Cooling of the ozone generator	4
6	Technical specification of the ozone generation plant	4
6.1	Nameplate	5
7	Individual units, design and materials of ozone generation plants	5
7.1	System for purifying the operating gas	5
7.2	Ozone generator	6
7.3	Electrical system for generating the high-voltage and, if necessary, for frequency conversion	6
7.4	Plant operating and monitoring systems	7
7.5	Safety systems	7
8	Installation site	8
9	Coolant	8
10	Operating requirements	8
11	Determination of ozone concentration	9
11.1	Titrimetic determination of ozone concentration by the KI method [2]	9
11.2	Information on other methods of determination	11
12	Nominal output of ozone generation plant and acceptance procedure	11
