## Hydrometry - Suspended sediment in streams and canals - Determination of concentration by surrogate techniques

---

<b>Contents</b>	<b>Page</b>
Foreword .....	iv
Introduction .....	v
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	1
4 Measuring principles .....	2
4.1 Transmission .....	2
4.2 Scattering .....	2
4.3 Transmission -- Scattering .....	3
4.4 Diffraction .....	3
5 Properties of sediment of importance for sediment surrogate techniques .....	3
5.1 General .....	3
5.2 Particle size .....	4
5.3 Particle colour .....	4
6 Methods for determination of suspended sediment concentration by surrogate techniques .....	4
6.1 General .....	4
6.2 Bulk optics .....	4
6.3 Laser diffraction (LD) .....	5
6.4 Acoustic back scatter (ABS) .....	5
7 Calibration and validation .....	6
Annex A (informative) Determination of the concentration of suspended sediment by optical techniques .....	9
Annex B (informative) Determination of the concentration of suspended sediment by laser diffraction technique .....	12
Annex C (informative) Determination of the concentration of suspended sediment by acoustic back scatter .....	14
Bibliography .....	18
