Hydrometry - Suspended sediment in streams and canals - Determination of concentration by surrogate techniques

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Measuring principles	2
4.1	Transmission	2
4.2	Scattering	2
4.3	Transmission -- Scattering	3
4.4	Diffraction	3
5	Properties of sediment of importance for sediment surrogate techniques	3
5.1	General	3
5.2	Particle size	4
5.3	Particle colour	4
6	Methods for determination of suspended sediment concentration by surrogate techniques	4
6.1	General	4
6.2	Bulk optics	4
6.3	Laser diffraction (LD)	5
6.4	Acoustic back scatter (ABS)	5
7	Calibration and validation	6
Annex A (informative)	Determination of the concentration of suspended sediment by optical techniques	9
Annex B (informative)	Determination of the concentration of suspended sediment by laser diffraction technique	12
Annex C (informative)	Determination of the concentration of suspended sediment by acoustic back scatter	14
