ISO 5667-6:2014-07 (E)

Water quality - Sampling - Part 6: Guidance on sampling of rivers and streams

Contents

Page

Foreword v

Introduction vii

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Design of sampling programme 3

5 Sampling location 4
5.1 Sampling point selection 4
5.2 Frequency and time of sampling 8

6 Preparation for sampling 8

7 Samplingatspecificlocations 9
7.1 General 9
7.2 Sampling from bridges 10
7.3 In-stream sampling 11
7.4 Sampling from the bank side 11
7.5 Sampling from craft 12
7.6 Sampling under ice 12

8 Sampling methods 12
8.1 Single, discrete samples 12
8.2 Sampling from specific depths 12

9 Sampling equipment 13
9.1 Single, discrete samples 13
9.2 Sampling of surface layers for LNAPL (e.g. oils) or surface films 14
9.3 Devices for sampling from specific depths 14
9.4 Automatic sampling devices 14
9.5 Other sampling equipment 15

10 Taking the sample 15
10.1 Risk factors 15
10.2 Arrival on site 15
10.3 Rinsing the equipment 16
10.4 Direct sampling 16
10.5 Indirect sampling using a sampling vessel 16
10.6 Sampling through ice 17
10.7 Sampling of surface layers or films 17
10.8 Sampling by increments 17
10.9 Adding preservatives in the field 17
10.10 Labelling 17

11 Stabilization, transport, and storage of samples 17
11.1 Stabilization 17
11.2 Transportation 18

11.3 Security and traceability of samples during storage and delivery 18

12 Quality assurance 18
12.1 Avoidance of contamination 18
12.2 Sample identification and records 19
12.3 Assurance and quality control 19

13 Reports 19
13.1 Analytical reports 19
13.2 Sampling protocols 20

14 Certification,registration,oraccreditation 20

15 Safety precautions 20

Annex A (informative) Calculation of complete mixing distance 22

Annex B (informative) Example of a report - Sampling from rivers and streams 23

Bibliography 26
