

DIN EN 15863:2015-06 (E)

Characterization of waste - Leaching behaviour test for basic characterization - Dynamic monolithic leaching test with periodic leachant renewal, under fixed conditions

Contents		Page
Foreword		4
Introduction		5
1	Scope	7
2	Normative references	7
3	Terms and definitions	8
4	Principle	10
5	Reagents	10
6	Equipment	11
7	Sample preparation	12
7.1	General	12
7.2	Preparation of the test portion	12
7.3	Determination of the geometric surface area	12
8	Procedure	13
8.1	Testing conditions	13
8.2	Step 1 of the leaching procedure	13
8.3	Steps 2 - 8 of the leaching procedure	13
8.4	Weight loss of the monolithic waste during the test	14
8.5	Further preparation of the eluates for analysis	14
8.6	Blank test	15
9	Calculations	15
9.1	Expression of results	15
9.1.1	General	15
9.1.2	Expression of results in terms of area related release	16
9.1.3	Expression of results in concentrations	17
9.1.4	Calculation of release mechanism	17
10	Performance characteristics	17
11	Documentation and test report	18
11.1	General	18
11.2	General data	18
11.3	Leaching test conditions	18
11.4	Analytical report	18
11.5	Results of the leaching test	19
Annex A (informative)	Identification of release mechanisms and use of test results	20
A.1	Introduction	20
A.2	Examples of factors influencing the leaching of monolithic waste	20

A.3	Long term release prediction	22
Annex B (informative) Assessment of release mechanisms (if required)		23
B.1	Overview of release mechanisms	23
B.2	Procedure of identification of release mechanisms	24
B.3	Concentrations close to the limit of quantification	25
B.3.1	Overall low concentrations	25
B.3.2	Surface wash-off followed by low concentrations	26
B.4	Diffusion controlled release of a substance	26
B.4.1	Identification of diffusion controlled release	26
B.4.2	Surface wash-off preceding diffusion-controlled release	28
B.4.3	Diffusion-controlled release followed by depletion	28
B.4.4	Surface wash-off preceding diffusion-controlled release followed by depletion	28
B.5	Dissolution controlled release of a substance	28
B.6	Other release mechanism	29
B.6.1	Unidentified release mechanism	29
B.6.2	Surface wash-off of a substance	29
B.6.3	Depletion of a substance	30
B.6.4	Surface wash-off and depletion	31
B.7	Calculation of release	31
B.7.1	Area release	31
B.7.2	Surface wash-off	31
B.7.3	Release in the case of dissolution	31
B.7.4	Extrapolation of the cumulative area release for larger time values	31
B.8	Examples	32
Annex C (informative) Examples of data about the L/A ratio		51
Annex E (informative) Repeatability and reproducibility data		54
E.1	Material used in the interlaboratory comparison study	54
E.2	Interlaboratory comparison results	54
Bibliography		61
