

DIN EN 15863:2015-06 (E)

Characterization of waste - Leaching behaviour test for basic characterization - Dynamic monolithic leaching test with periodic leachant renewal, under fixed conditions

| Contents | | Page |
|-----------------------|--|-------------|
| Foreword | | 4 |
| Introduction | | 5 |
| 1 | Scope | 7 |
| 2 | Normative references | 7 |
| 3 | Terms and definitions | 8 |
| 4 | Principle | 10 |
| 5 | Reagents | 10 |
| 6 | Equipment | 11 |
| 7 | Sample preparation | 12 |
| 7.1 | General | 12 |
| 7.2 | Preparation of the test portion | 12 |
| 7.3 | Determination of the geometric surface area | 12 |
| 8 | Procedure | 13 |
| 8.1 | Testing conditions | 13 |
| 8.2 | Step 1 of the leaching procedure | 13 |
| 8.3 | Steps 2 - 8 of the leaching procedure | 13 |
| 8.4 | Weight loss of the monolithic waste during the test | 14 |
| 8.5 | Further preparation of the eluates for analysis | 14 |
| 8.6 | Blank test | 15 |
| 9 | Calculations | 15 |
| 9.1 | Expression of results | 15 |
| 9.1.1 | General | 15 |
| 9.1.2 | Expression of results in terms of area related release | 16 |
| 9.1.3 | Expression of results in concentrations | 17 |
| 9.1.4 | Calculation of release mechanism | 17 |
| 10 | Performance characteristics | 17 |
| 11 | Documentation and test report | 18 |
| 11.1 | General | 18 |
| 11.2 | General data | 18 |
| 11.3 | Leaching test conditions | 18 |
| 11.4 | Analytical report | 18 |
| 11.5 | Results of the leaching test | 19 |
| Annex A (informative) | Identification of release mechanisms and use of test results | 20 |
| A.1 | Introduction | 20 |
| A.2 | Examples of factors influencing the leaching of monolithic waste | 20 |

| | | |
|--|---|----|
| A.3 | Long term release prediction | 22 |
| Annex B (informative) Assessment of release mechanisms (if required) | | 23 |
| B.1 | Overview of release mechanisms | 23 |
| B.2 | Procedure of identification of release mechanisms | 24 |
| B.3 | Concentrations close to the limit of quantification | 25 |
| B.3.1 | Overall low concentrations | 25 |
| B.3.2 | Surface wash-off followed by low concentrations | 26 |
| B.4 | Diffusion controlled release of a substance | 26 |
| B.4.1 | Identification of diffusion controlled release | 26 |
| B.4.2 | Surface wash-off preceding diffusion-controlled release | 28 |
| B.4.3 | Diffusion-controlled release followed by depletion | 28 |
| B.4.4 | Surface wash-off preceding diffusion-controlled release followed by depletion | 28 |
| B.5 | Dissolution controlled release of a substance | 28 |
| B.6 | Other release mechanism | 29 |
| B.6.1 | Unidentified release mechanism | 29 |
| B.6.2 | Surface wash-off of a substance | 29 |
| B.6.3 | Depletion of a substance | 30 |
| B.6.4 | Surface wash-off and depletion | 31 |
| B.7 | Calculation of release | 31 |
| B.7.1 | Area release | 31 |
| B.7.2 | Surface wash-off | 31 |
| B.7.3 | Release in the case of dissolution | 31 |
| B.7.4 | Extrapolation of the cumulative area release for larger time values | 31 |
| B.8 | Examples | 32 |
| Annex C (informative) Examples of data about the L/A ratio | | 51 |
| Annex E (informative) Repeatability and reproducibility data | | 54 |
| E.1 | Material used in the interlaboratory comparison study | 54 |
| E.2 | Interlaboratory comparison results | 54 |
| Bibliography | | 61 |
