# ISO 5667-14:2014-12 (E)

## Water quality - Sampling - Part 14: Guidance on quality assurance and quality control of environmental water sampling an d handling

## Contents

Page

Foreword ..... iv

Introduction ..... vi

1 Scope ..... 1

2 Normative references ..... 1

3 Termsanddefinitions ..... 1

4 Sources of sampling error ..... 4

5 Sampling quality ..... 5
5.1 General ..... 5
5.2 Technical and personnel requirements ..... 6
5.3 Sampling manual ..... 6
5.4 Training of sampling staff ..... 7

6 Strategy and organization ..... 7
6.1 Time, duration and frequency of sampling ..... 7
6.2 Sampling collection locations ..... 8

7 Sample collection and handling ..... 8
7.1 Equipment and vehicle check prior to carrying out a sampling programme ..... 8
7.2 Preparation for sampling on-site ..... 9
7.3 Field measurements ..... 9
7.4 Taking the samples ..... 9

8 Sampleidentification ..... 12

9 Field sample protocol ..... 12

10 Transport and storage of samples ..... 12

11 Sampling quality control techniques ..... 13
11.1 General ..... 13
11.2 Replicate quality control samples ..... 15
11.3 Field blank samples ..... 16
11.4 Rinsing of equipment (sampling containers) ..... 17
11.5 Filtration recovery ..... 18
11.6 Technique 1 -- Spiked samples ..... 20
11.7 Technique 2 -- Spiked environmental samples ..... 22

12 Analysis and interpretation of quality control data ..... 22
12.1 Shewhart control charts ..... 22
12.2 Construction of duplicate control charts ..... 23

13 Independent audits ..... 23

Annex A (informative) Common sources of sampling error[7] ..... 25

**Annex B (informative) Control charts ..... 27**

**Annex C (informative) Sub-sampling using a homogenizer ..... 31**

**Bibliography ..... 34**
