DIN EN 16694:2015-12 (E)

Water quality - Determination of selected polybrominated diphenyl ether (PBDE) in whole water samples - Method using solid phase extraction (SPE) with SPE-disks combined with gas chromatography-mass spectrometry (GC-MS)

Contents

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Principle 6

4 Interferences 7
4.1 Interferences with extraction and clean up 7
4.2 Interferences with GC-MS 7

5 Reagents 7

6 Apparatus 10

7 Sampling 11

8 Procedure 11
8.1 Sample preparation 11
8.2 Extraction by solid-phase extraction disks (SPE-disks) 11
8.3 Solvent concentration 12
8.4 Gas chromatrography and mass spectrometry 12
8.5 Identification of individual compounds by means of GC-MS 12
8.6 Blank value measurements 14

9 Calibration 15
9.1 Calibration with internal standards 15
9.2 Procedure 15
9.2.1 Evaluation of the range of linear relationship 15
9.2.2 Two point calibration over the total linear range 15
9.2.3 Estimation of the accuracy of the calibration for the concentration of interest 16

10 Quantification 17
10.1 Determination of the BDE concentrations in whole water samples 17
10.2 Determination of the recoveries of the internal standards 18

11 Expression of results 18

12 Test report 19

Annex A (informative) Suitable gas chromatographic conditions and example chromatograms 20

A.1 GC-HRMS conditions for the chromatograms in Figure A.1 20
A.2 GC-MS/MS conditions for the chromatograms in Figure A.2 23
A.3 GC-NCI-MS conditions for the chromatograms in Figure A.3 25

Annex B (informative) Repeatability and reproducibility data 26

Annex C (informative) Examples of suitable solid phase extraction disks 29

Annex D (informative) Clean up procedure 30

D.1 Reagents 30

D.2 Procedure 30
