

# DIN EN 16695:2015-12 (E)

## Water quality - Guidance on the estimation of phytoplankton biovolume

---

<b>Contents</b>		<b>Page</b>
European foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	5
4	Principle .....	5
5	Equipment and preservatives .....	6
6	Procedure .....	7
6.1	Sampling and sample preparation .....	7
6.2	Calibration of the eyepiece micrometre, counting-graticule and image analysis software ...	7
6.3	Statistical requirements for determination .....	8
6.4	Measurement .....	9
6.4.1	General .....	9
6.4.2	Using size classes based on representative measurements .....	10
6.4.3	How to deal with hidden dimensions .....	10
6.4.4	Measurement of filamentous taxa .....	10
6.4.5	Measurement and counting of colony- and coenobium-forming taxa .....	11
6.4.6	Measurement of complex geometrical shapes .....	12
6.5	Calculation of biovolume .....	12
6.6	Biovolume biomass relations .....	13
6.7	Reporting .....	13
7	Quality Assurance .....	13
Annex A (informative) List of geometrical shapes .....		14
Annex B (informative) Performance data .....		23
Annex C (informative) Carbon content calculation .....		28
Annex D (informative) Alphabetical list of recommended geometrical shapes and hidden dimension factors .....		30
Annex E (informative) Example: Genus-specific instruction for measurement of dimensions .....		96
Bibliography .....		99
