

ISO/TR 21414:2016-02 (E)

Hydrometry - Groundwater - Surface geophysical surveys for hydrogeological purposes

Contents		Page
Foreword		vi
Introduction		vii
1	Scope	1
2	Terms and definitions	1
3	Units of measurement	5
4	Purpose of geophysical survey	5
5	Planning	6
5.1	General considerations	6
5.2	Access to the area	6
5.3	Equipment	6
5.4	Safety and precautions in operation	6
5.5	Planning of survey	7
5.6	Quality control in field data collection	7
5.7	Site/area details	7
6	Electrical resistivity	7
6.1	Purpose	7
6.2	Principles of measurement	8
6.3	Instruments	13
6.4	Field procedures	13
6.5	Processing of data	15
6.6	Interpretation	15
6.7	Advantages	17
6.8	Disadvantages	17
6.9	Limitations	17
7	Self-potential	18
7.1	Purpose	18
7.2	Principles of measurement	18
7.3	Instrument	18
7.4	Field procedures	18
7.5	Processing of data	19
7.6	Interpretation	19
7.7	Advantages	19
7.8	Disadvantages	19
7.9	Limitations	19
8	Frequency domain electromagnetic (horizontal loop)	20
8.1	Purpose	20
8.2	Principles of measurement	20
8.3	Instrument	21
8.4	Field procedures	21
8.5	Processing of data	22
8.6	Interpretations	22
8.7	Advantages	22

8.8	Disadvantages	23
8.9	Limitations	23
9	Transient (time domain) electromagnetic	23
9.1	Purpose	23
9.2	Principles of measurement	23
9.3	Instrument	23
9.4	Field procedures	24
9.5	Processing of data	24
9.6	Interpretation	24
9.7	Advantages	24
9.8	Disadvantages	24
9.9	Limitations	25
10	Very low frequency (VLF) electromagnetic	25
10.1	Purpose	25
10.2	Principles of measurement	25
10.3	Instrument	25
10.4	Field procedures	26
10.5	Processing of data	26
10.6	Interpretation	26
10.7	Advantages	27
10.8	Disadvantages	27
10.9	Limitations	27
11	Seismic refraction	27
11.1	Purpose	27
11.2	Principles of measurement	27
11.3	Instruments	31
11.4	Field procedure	31
11.5	Processing of data	32
11.6	Interpretation	32
11.7	Advantages	32
11.8	Disadvantages	32
11.9	Limitations	32
12	Seismicreflection	32
12.1	Purpose	32
12.2	Principles of measurement	33
12.3	Instrument	33
12.4	Field procedures	33
12.5	Acquisition and processing of data	34
12.6	Interpretation	34
12.7	Advantages	34
12.8	Disadvantages	34
12.9	Limitations	35
12.10	Comparison of seismic refraction and reflection methods	35
13	Magnetic	35
13.1	Purpose	35
13.2	Principles of measurement	35
13.3	Instrument	36
13.4	Field procedures	36
13.5	Processing of data	37
13.6	Interpretation	38
13.7	Advantages	38
13.8	Disadvantages	38
13.9	Limitations	38
14	Gravity	38
14.1	Purpose	38

14.2	Principles of measurement	38
14.3	Instrument	39
14.4	Field procedure	39
14.5	Processing of data	39
14.6	Micro-gravity measurements	39
14.7	Interpretation	40
14.8	Advantages	40
14.9	Disadvantages	40
14.10	Limitations	40
15	Other techniques	40
15.1	Induced polarization	40
15.1.1	Purpose	40
15.1.2	Principles of measurement	41
15.1.3	Instrument	41
15.1.4	Field procedures	41
15.1.5	Processing of data	42
15.1.6	Interpretation	42
15.1.7	Advantages	42
15.1.8	Disadvantages	42
15.1.9	Limitations	42
15.2	Mise-a-la-masse	42
15.2.1	Purpose	42
15.2.2	Principles of measurement	42
15.2.3	Instrument	43
15.2.4	Field procedures	43
15.2.5	Processing of data	43
15.2.6	Interpretation	43
15.2.7	Advantages	44
15.2.8	Disadvantages	44
15.2.9	Limitations	44
15.3	Ground-Penetrating Radar (GPR)	44
15.3.1	Purpose	44
15.3.2	Principles of measurements	44
15.3.3	Field procedures and data acquisition	45
15.3.4	Interpretation	47
15.3.5	Advantages	49
15.3.6	Disadvantages	49
16	Report writing and presentation of results	50
	Bibliography	52
