## Hydrometry - Groundwater - Surface geophysical surveys for hydrogeological purposes

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | vi          |
| Introduction ..... |  | vii         |
| 1                  | Scope .....  | 1           |
| 2                  | Terms and definitions .....                              | 1           |
| 3                  | Units of measurement .....                               | 5           |
| 4                  | Purpose of geophysical survey .....                      | 5           |
| 5                  | Planning .....   | 6           |
| 5.1                | General considerations .....                             | 6           |
| 5.2                | Access to the area .....                                 | 6           |
| 5.3                | Equipment .....  | 6           |
| 5.4                | Safety and precautions in operation .....                | 6           |
| 5.5                | Planning of survey .....                                 | 7           |
| 5.6                | Quality control in field data collection .....           | 7           |
| 5.7                | Site/area details .....                                  | 7           |
| 6                  | Electrical resistivity .....                             | 7           |
| 6.1                | Purpose .....  | 7           |
| 6.2                | Principles of measurement .....                          | 8           |
| 6.3                | Instruments .....  | 13          |
| 6.4                | Field procedures .....                                   | 13          |
| 6.5                | Processing of data .....                                 | 15          |
| 6.6                | Interpretation .....                                     | 15          |
| 6.7                | Advantages .....   | 17          |
| 6.8                | Disadvantages .....                                      | 17          |
| 6.9                | Limitations .....  | 17          |
| 7                  | Self-potential .....                                     | 18          |
| 7.1                | Purpose .....  | 18          |
| 7.2                | Principles of measurement .....                          | 18          |
| 7.3                | Instrument .....   | 18          |
| 7.4                | Field procedures .....                                   | 18          |
| 7.5                | Processing of data .....                                 | 19          |
| 7.6                | Interpretation .....                                     | 19          |
| 7.7                | Advantages .....   | 19          |
| 7.8                | Disadvantages .....                                      | 19          |
| 7.9                | Limitations .....  | 19          |
| 8                  | Frequency domain electromagnetic (horizontal loop) ..... | 20          |
| 8.1                | Purpose .....  | 20          |
| 8.2                | Principles of measurement .....                          | 20          |
| 8.3                | Instrument .....   | 21          |
| 8.4                | Field procedures .....                                   | 21          |
| 8.5                | Processing of data .....                                 | 22          |
| 8.6                | Interpretations .....                                    | 22          |
| 8.7                | Advantages .....   | 22          |

|       |   |    |
|-------|---|----|
| 8.8   | Disadvantages .....   | 23 |
| 8.9   | Limitations .....   | 23 |
| 9     | Transient (time domain) electromagnetic .....                 | 23 |
| 9.1   | Purpose .....   | 23 |
| 9.2   | Principles of measurement .....                               | 23 |
| 9.3   | Instrument .....  | 23 |
| 9.4   | Field procedures .....  | 24 |
| 9.5   | Processing of data .....                                      | 24 |
| 9.6   | Interpretation .....  | 24 |
| 9.7   | Advantages .....  | 24 |
| 9.8   | Disadvantages .....   | 24 |
| 9.9   | Limitations .....   | 25 |
| 10    | Very low frequency (VLF) electromagnetic .....                | 25 |
| 10.1  | Purpose .....   | 25 |
| 10.2  | Principles of measurement .....                               | 25 |
| 10.3  | Instrument .....  | 25 |
| 10.4  | Field procedures .....  | 26 |
| 10.5  | Processing of data .....                                      | 26 |
| 10.6  | Interpretation .....  | 26 |
| 10.7  | Advantages .....  | 27 |
| 10.8  | Disadvantages .....   | 27 |
| 10.9  | Limitations .....   | 27 |
| 11    | Seismic refraction .....                                      | 27 |
| 11.1  | Purpose .....   | 27 |
| 11.2  | Principles of measurement .....                               | 27 |
| 11.3  | Instruments .....   | 31 |
| 11.4  | Field procedure .....   | 31 |
| 11.5  | Processing of data .....                                      | 32 |
| 11.6  | Interpretation .....  | 32 |
| 11.7  | Advantages .....  | 32 |
| 11.8  | Disadvantages .....   | 32 |
| 11.9  | Limitations .....   | 32 |
| 12    | Seismicreflection .....                                       | 32 |
| 12.1  | Purpose .....   | 32 |
| 12.2  | Principles of measurement .....                               | 33 |
| 12.3  | Instrument .....  | 33 |
| 12.4  | Field procedures .....  | 33 |
| 12.5  | Acquisition and processing of data .....                      | 34 |
| 12.6  | Interpretation .....  | 34 |
| 12.7  | Advantages .....  | 34 |
| 12.8  | Disadvantages .....   | 34 |
| 12.9  | Limitations .....   | 35 |
| 12.10 | Comparison of seismic refraction and reflection methods ..... | 35 |
| 13    | Magnetic .....  | 35 |
| 13.1  | Purpose .....   | 35 |
| 13.2  | Principles of measurement .....                               | 35 |
| 13.3  | Instrument .....  | 36 |
| 13.4  | Field procedures .....  | 36 |
| 13.5  | Processing of data .....                                      | 37 |
| 13.6  | Interpretation .....  | 38 |
| 13.7  | Advantages .....  | 38 |
| 13.8  | Disadvantages .....   | 38 |
| 13.9  | Limitations .....   | 38 |
| 14    | Gravity .....   | 38 |
| 14.1  | Purpose .....   | 38 |

|        |  |    |
|--------|--|----|
| 14.2   | Principles of measurement .....                  | 38 |
| 14.3   | Instrument .....                                 | 39 |
| 14.4   | Field procedure .....                            | 39 |
| 14.5   | Processing of data .....                         | 39 |
| 14.6   | Micro-gravity measurements .....                 | 39 |
| 14.7   | Interpretation .....                             | 40 |
| 14.8   | Advantages .....                                 | 40 |
| 14.9   | Disadvantages .....                              | 40 |
| 14.10  | Limitations .....                                | 40 |
| 15     | Other techniques .....                           | 40 |
| 15.1   | Induced polarization .....                       | 40 |
| 15.1.1 | Purpose .....                                    | 40 |
| 15.1.2 | Principles of measurement .....                  | 41 |
| 15.1.3 | Instrument .....                                 | 41 |
| 15.1.4 | Field procedures .....                           | 41 |
| 15.1.5 | Processing of data .....                         | 42 |
| 15.1.6 | Interpretation .....                             | 42 |
| 15.1.7 | Advantages .....                                 | 42 |
| 15.1.8 | Disadvantages .....                              | 42 |
| 15.1.9 | Limitations .....                                | 42 |
| 15.2   | Mise-a-la-masse .....                            | 42 |
| 15.2.1 | Purpose .....                                    | 42 |
| 15.2.2 | Principles of measurement .....                  | 42 |
| 15.2.3 | Instrument .....                                 | 43 |
| 15.2.4 | Field procedures .....                           | 43 |
| 15.2.5 | Processing of data .....                         | 43 |
| 15.2.6 | Interpretation .....                             | 43 |
| 15.2.7 | Advantages .....                                 | 44 |
| 15.2.8 | Disadvantages .....                              | 44 |
| 15.2.9 | Limitations .....                                | 44 |
| 15.3   | Ground-Penetrating Radar (GPR) .....             | 44 |
| 15.3.1 | Purpose .....                                    | 44 |
| 15.3.2 | Principles of measurements .....                 | 44 |
| 15.3.3 | Field procedures and data acquisition .....      | 45 |
| 15.3.4 | Interpretation .....                             | 47 |
| 15.3.5 | Advantages .....                                 | 49 |
| 15.3.6 | Disadvantages .....                              | 49 |
| 16     | Report writing and presentation of results ..... | 50 |
|        | Bibliography .....                               | 52 |
