DIN EN ISO 5667-6:2016-12 (E)

Water quality - Sampling - Part 6: Guidance on sampling of rivers and streams (ISO 5667-6:2014)

Contents

Page

European foreword 4

Annex ZA (informative) A-deviation 5

Foreword 6

Introduction 8

1 Scope 9

2 Normative references 9

3 Terms and definitions 9

4 Design of sampling programme 11

5 Sampling location 12
5.1 Sampling point selection 12
5.2 Frequency and time of sampling 16

6 Preparation for sampling 16

7 Sampling at specific locations 17
7.1 General 17
7.2 Sampling from bridges 18
7.3 In-stream sampling 19
7.4 Sampling from the bank side 19
7.5 Sampling from craft 20
7.6 Sampling under ice 20

8 Sampling methods 20
8.1 Single, discrete samples 20
8.2 Sampling from specific depths 20

9 Sampling equipment 21
9.1 Single, discrete samples 21
9.2 Sampling of surface layers for LNAPL (e.g. oils) or surface films 22
9.3 Devices for sampling from specific depths 22
9.4 Automatic sampling devices 22
9.5 Other sampling equipment 23

10 Taking the sample 23
10.1 Risk factors 23
10.2 Arrival on site 32
10.3 Rinsing the equipment 24
10.4 Direct sampling 24
10.5 Indirect sampling using a sampling vessel 24
10.6 Sampling through ice 25
10.7 Sampling of surface layers or films 25
10.8 Sampling by increments 25
10.9 Adding preservatives in the field 25

10.10 Labelling 25

11 Stabilization, transport, and storage of samples 25
11.1 Stabilization 25
11.2 Transportation 26
11.3 Security and traceability of samples during storage and delivery 26

12 Quality assurance 26
12.1 Avoidance of contamination 26
12.2 Sample identification and records 27
12.3 Assurance and quality control 27

13 Reports 27
13.1 Analytical reports 27
13.2 Sampling protocols 28

14 Certification, registration, or accreditation 28

15 Safety precautions 28

Annex A (informative) Calculation of complete mixing distance 30

Annex B (informative) Example of a report - Sampling from rivers and streams 31

Bibliography 34
