

DIN EN ISO 20227:2017-10 (E)

Water quality - Determination of the growth inhibition effects of waste waters, natural waters and chemicals on the duckweed *Spirodela polyrhiza* - Method using a stock culture independent microbioassay (ISO 20227:2017)

Contents		Page
European foreword		3
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Principle	7
5	Test organisms	8
6	Growth medium	8
6.1	Preparation of stock solutions	9
6.2	Preparation of the final concentration of modified Steinberg medium	9
7	Apparatus	9
8	Reference chemicals	10
9	Procedure	10
9.1	Germination of the <i>Spirodela polyrhiza</i> turions	10
9.2	Tests on effluents (and waste waters)	10
9.2.1	Addition of concentrated growth medium to the effluent sample	10
9.2.2	Preparation of the effluent dilutions	11
9.2.3	Procedure	11
9.3	Tests on chemical compounds	12
9.3.1	Range finding test	12
9.3.2	Definitive test	13
9.4	Filling of the test plate with the toxicant dilutions	14
9.4.1	General	14
9.4.2	Procedure	14
9.5	Transfer of the germinated turions in the test cups	15
9.6	Photo of the multiwell at the start of the toxicity test	15
9.7	Incubation of the multiwell	15
9.8	Photo of the multiwell at the end of the toxicity test	16
9.9	Measurement of the area of the first fronds	16
10	Data treatment -- Calculation of the growth inhibition	16
11	Validity criterion	17
12	Test sensitivity	17
13	Test with reference chemicals	17

14	Test report	20
	Annex A (informative) Spirodela polyrhiza stock culturing for turion production	21
	Annex B (informative) Sensitivity of the Spirodela polyrhiza microbiotest	22
	Annex C (informative) Performance data	24
	Bibliography	25
