## Soil quality - Sampling - Part 204: Guidance on sampling of soil gas

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	2
3	Terms and definitions .....	2
4	Preliminary items to be considered .....	5
5	Basic principles .....	6
5.1	Physical and chemical principles .....	6
5.1.1	Permanent gases .....	6
5.1.2	Volatile organic compounds .....	7
5.2	Environmental conditions .....	7
5.3	Soil gas dynamics .....	9
5.4	Identifying the source of soil gas .....	9
6	Requirements for sampling plan .....	10
6.1	General considerations for sampling plan .....	10
6.1.1	Objectives and general recommendations .....	10
6.1.2	Initial explorations (field screening) .....	12
6.1.3	Known contamination centre .....	12
6.1.4	Determination of the contamination hot spots (areas showing highest concentrations) and gas monitoring wells location .....	12
6.1.5	Determination of horizontal and vertical distribution of VOCs .....	13
6.1.6	Observation of spatial distribution of VOCs in the course of time .....	13
6.1.7	Evaluation of soil gases contribution to ambient, indoor and/or outdoor air .....	13
6.2	Working ranges of measurement methods .....	13
6.3	Monitoring well options .....	14
6.4	Sampling plan .....	17
6.4.1	Horizontal location of sampling devices .....	17
6.4.2	Monitoring depths .....	18
6.4.3	Timing and frequency of monitoring .....	19
6.4.4	Sample volumes and sampling rates .....	20
7	Construction of monitoring installations .....	21
7.1	General .....	21
7.1.1	Environmental conditions .....	21
7.1.2	Instruments .....	21
7.2	Soil gas sampling devices .....	21
7.2.1	Passive soil gas sampling .....	21
7.2.2	Sub-slab .....	22
7.2.3	Driven probes .....	22
7.2.4	Gas-monitoring standpipe in a borehole .....	23
8	Sampling .....	26
8.1	Generic consideration .....	26
8.2	Preparation of the monitoring installations .....	29
8.2.1	Preparation of the sampling point .....	29

8.2.2	Leakage test .....	29
8.2.3	Purge .....	29
8.3	Active sampling .....	30
8.3.1	General .....	30
8.3.2	Sorbent tubes or filters .....	31
8.3.3	Sample containers -- Sampling bags .....	34
8.3.4	Sparging .....	35
8.3.5	Sample containers -- Pressurized containers .....	35
8.4	Passive sampling .....	35
8.5	Sampling for on-site measurements .....	36
9	Identification, packaging and transport of samples for laboratory analysis .....	37
9.1	Identification .....	37
9.2	Packaging and transport .....	37
10	Sampling report .....	37
11	Quality assurance .....	38
11.1	General .....	38
11.2	Quality control samples .....	39
11.2.1	General .....	39
11.2.2	Blind replicate samples .....	40
11.2.3	Split samples .....	40
11.2.4	Trip blanks .....	40
11.2.5	Field blanks .....	40
11.2.6	Other quality control samples .....	40
11.2.7	Evaluation of quality control sample results .....	40
11.2.8	Chain of custody .....	41
11.2.9	Equipment .....	41
11.3	Interferences .....	42
11.3.1	General .....	42
11.3.2	Large sample volume .....	42
11.3.3	Cohesive soils .....	42
11.3.4	Soil moisture .....	42
11.3.5	Low ambient temperatures .....	42
11.3.6	Heterogeneous stratigraphy .....	42
11.3.7	Seepage front .....	42
11.3.8	Perched water table horizon .....	43
11.3.9	Contamination .....	43
11.3.10	Breakthrough .....	43
11.4	Interpretation of soil gas analyses for VOCs .....	43
Annex A (informative) Standard equipment and instruments used for soil gas sampling for VOCs ..		44
Annex B (informative) Portable equipment to measure gases .....		46
Annex C (informative) Equipment to measure flow rates and borehole pressure .....		48
Annex D (informative) Example of sampling sheet .....		50
Bibliography .....		52
