# DIN EN ISO 6416:2019-03 (E)

## Hydrometry - Measurement of discharge by the ultrasonic transit time (time of flight) method (ISO 6416:2017)

## Contents

Page

**European foreword** ... **4**

**Foreword** ... **5**

**1 Scope** ... **6**

**2 Normative references** ... **6**

**3 Terms and definitions** ... **6**

**4 Applications** ... **6**
4.1 Types of applications ... 6
4.2 Attributes and limitations ... 7

**5 Method of measurement** ... **7**
5.1 Discharge ... 7
5.2 Calculation of discharge from the transit-time measurement ... 8

**6 Flow velocity determination by the ultrasonic (transit time) method** ... **8**
6.1 Principle ... 8
6.2 Sound propagation in water ... 10
6.2.1 General ... 10
6.2.2 Speed of sound in water ... 11
6.2.3 Propagation losses ... 11
6.2.4 Signal path bending ... 13
6.2.5 Reflection ... 14

**7 Gauge configuration** ... **15**
7.1 General ... 15
7.2 Single-path systems ... 15
7.3 Multi-path systems ... 16
7.4 Crossed-path systems ... 16
7.5 Reflected-path systems ... 18
7.6 Systems using transponders ... 19
7.7 Wireless systems (if a cable crossing is not possible) ... 20
7.8 Systems using divided cross-sections ... 21
7.9 Sloping paths ... 21

**8 Determination of discharge** ... **22**
8.1 Single-path systems ... 22
8.2 Multi-path systems ... 23
8.2.1 General ... 23
8.2.2 Mid-section method ... 24
8.2.3 Mean-section method ... 25
8.3 Systems with transducers in the channel ... 26

**9 System verification and calibration** ... **27**

**10 Site selection** ... **28**

**11 Site survey — Before design and construction** ... **28**
11.1 General ... 28
11.2 Visual survey ... 28
11.3 Survey of the cross-section ... 29
11.4 Survey of velocity distribution ... 29
11.5 Survey of signal propagation ... 29

**12 Operational measurement requirements** ..... **29**
12.1 General ..... 29
12.2 Basic components of flow determination ..... 30
12.3 Water velocity determination ..... 30
12.4 Determination of water stage or depth ..... 30
12.5 Determination of mean bed level ..... 31
12.6 Channel width ..... 32
**13 Gauging station equipment** ..... **32**
13.1 General ..... 32
13.2 Design and construction of equipment ..... 33
13.2.1 Transducers ..... 33
13.2.2 Transducer cables ..... 34
13.3 Reflectors ..... 34
13.4 Civil engineering works ..... 37
13.5 Signal timing and processing ..... 37
13.5.1 General ..... 37
13.5.2 Signal-to-noise ratio ..... 37
13.5.3 Signal maintenance (gain control) ..... 38
13.5.4 Signal detection ..... 38
13.5.5 Post-detection filtering ..... 39
13.6 System self-checking ..... 39
13.7 Site-specific data (or site parameters) ..... 40
13.8 Clock and calendar ..... 40
13.9 System performance criteria ..... 40
13.9.1 General ..... 40
13.9.2 Operating environment ..... 41
13.9.3 Water environment ..... 41
13.9.4 Mechanical environment ..... 41
13.9.5 Extreme environmental conditions ..... 41
13.9.6 Power source ..... 41
13.9.7 Measurement uncertainty ..... 41
13.10 System output ..... 42
13.10.1 Local display ..... 42
13.10.2 Local record ..... 42
13.10.3 Remote record ..... 42
13.10.4 Diagnostic information ..... 42
13.11 Installation ..... 42
13.12 Commissioning ..... 43
13.13 Operating manual ..... 43
13.14 Maintenance ..... 44
**14 Measurement uncertainties** ..... **45**
14.1 General ..... 45
14.2 Definition of uncertainty ..... 45
14.3 Uncertainty in discharge ..... 46
14.3.1 Uncertainty equation ..... 46
14.3.2 Effective number of paths ..... 47
14.3.3 Uncertainty in the line velocity, $U_{\mathrm{lv}}$ ..... 47
14.3.4 Uncertainty in the channel width estimation, $U_w$ ..... 47
14.3.5 Examples of uncertainty estimation ..... 48
14.3.6 Uncertainty estimate at low flow ..... 49
14.3.7 Uncertainty estimate at high flow ..... 50
**Annex A** (informative) **Principle of measurement uncertainty** ..... **52**
**Annex B** (informative) **Performance guide for hydrometric equipment for use in technical standard examples** ..... **59**
**Bibliography** ..... **63**
