ISO 5667-12:2017-07 (E)

Water quality - Sampling - Part 12: Guidance on sampling of bottom sediments from rivers, lakes and estuarine areas

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Sampling strategy 3
4.1 General 3
4.2 Type of investigation 3
4.2.1 General 3
4.2.2 Chemical investigation 3
4.2.3 Physical investigation 3
4.2.4 Biological and microbiological investigation 4
4.3 Choice of sampling site 4
4.4 Choice of sampling point 4
4.5 Choice of sampling method 5
4.5.1 General 5
4.5.2 Consolidated bottom sediment 5
4.5.3 Unconsolidated bottom sediment 6
4.6 Frequency and time of sampling 6
4.7 Site conditions 6
4.7.1 General 6
4.7.2 Meteorological and climatic conditions 6
4.7.3 Hydrological conditions 7

5 Sampling equipment 8
5.1 General 8
5.2 Grab systems 8
5.3 Corer systems 10

6 Sampling procedure 13
6.1 Sampling container materials and types 13
6.2 Composite samples 13

7 Storage, transport and stabilization of samples 14

8 Safety 15

9 Sampleidentificationandrecords 15

Annex A (informative) Description of the scissor-grab system (van Veen type) 17

Annex B (informative) Description of the piston drill system 19

Annex C (informative) Description of the corer system involving a diver 21

Annex D (informative) Description of the Beeker sampler system 22

Annex E (informative) Description of the sealed core sampler system 25

Annex F (informative) Description of the wedge core or Vrijwit drill system 27

Annex G (informative) Description of the gravity corer system 29

Annex H (informative) Description of the Jenkins mud sampler system 31

Annex I (informative) Description of the Craib corer system 33

Annex J (informative) Description of a piston corer 35

Annex K (informative) Description of peat borers 38

Annex L (informative) Freeze coring 40

Annex M (informative) Description of sediment sampler with slicing mechanism 44
