Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Abbreviations 3

5 Sustainable remediation, (re)development and regeneration 3

6 Risk-based contaminated land management 4

7 Integrated assessments, metrics and evaluations 4
7.1 General 4
7.2 Tiered assessments 5
7.3 Tiered assessment frameworks 5
7.4 Sustainable remediation assessment techniques 5
7.4.1 General 5
7.4.2 Qualitative 6
7.4.3 Semiquantitative 6
7.4.4 Quantitative 7
7.5 Holistic sustainable remediation indicator sets 7

8 Decision making 7
8.1 General 7
8.2 Project framing 8
8.3 How to identify a sustainable remediation approach 8
8.4 Key principles in decision making 9
8.4.1 Principles 9
8.4.2 Stakeholder engagement 10
8.4.3 Selection of relevant indicators 10
8.4.4 Assessment of agreed indicators 10
8.4.5 Selection and implementation 10

9 Economic dimension 11
9.1 General 11
9.2 Economic indicators 11

10 Social dimension 12
10.1 General 12
10.2 Social indicators 12

11 Environmental dimension 13
11.1 General 13
11.2 Environmental indicators 13

12 Indicators and metrics 14
12.1 General 14

12.2 Setting objectives for remediation 15
12.3 Quantification and qualification 17
12.4 Options for indicator and metric selection 17

13 The role of sustainable remediation assessment tools 17
13.1 Sustainable remediation assessment 17
13.2 Intended objectives addressed by tools 18
13.3 Pre-determined indicators and metrics 18
13.4 Geographic and process specific information 18
13.5 General questions for understanding tool use and applicability 19

14 Communication 19

15 Promoting sustainable remediation 19

16 The role of governance and institutional structures 20
