DIN EN 16932-1:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 1: General requirements

Contents

Page

European foreword 4

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 General 11

5 Health and safety 11

6 Types of pumping systems 11
6.1 Introduction 11
6.2 Single pumping station systems 12
6.3 Lift stations 12
6.3.1 General 12
6.3.2 Pumping stations with screw pumps 12
6.4 Pressure sewer systems 13
6.5 Vacuum sewer systems 14
6.6 Selection 15

7 Planning of pumping systems 17
7.1 Introduction 17
7.2 Performance requirements 17
7.3 Location 18
7.3.1 General 18
7.3.2 Location of pumping stations and vacuum stations 18

8 Detailed design of pumping stations and vacuum stations 19
8.1 Introduction 19
8.2 External layout and access 19
8.3 Environmental impact 20
8.3.1 General 20
8.3.2 Impact of discharges from overflows 20
8.3.3 Noise and vibration 20
8.3.4 Odour control 20
8.3.5 Visual impact 20
8.4 Structural design 20
8.5 Power supply 21
8.6 Resilience 21
8.7 Pump units 22
8.7.1 General 22
8.7.2 Impellers 23
8.7.3 Pump drivers and drives 23
8.8 Instrumentation, controls and electrical equipment 24
8.8.1 General 24
8.8.2 Control systems 24
8.8.3 Monitoring 24

8.8.4 Power switchgear and controlgear assemblies (PSC-ASSEMBLIES) 25
8.9 Cabinets and buildings 26
8.10 Maintenance considerations 26

9 Detailed design of rising mains and vacuum pipelines 26
9.1 Introduction 26
9.2 Structural design 26
9.3 Choice of materials and components 27
9.4 Discharge points 28
9.5 Valves and valve chambers 28
9.5.1 Valves 28
9.5.2 Valve chambers 28
9.6 Means of inspection 29

10 Installation 29
10.1 Installation of pipelines 29
10.2 Installation of pumping stations and vacuum stations 29

11 Testing and commissioning 29
11.1 Commissioning 29

12 Operations and maintenance 29
12.1 Introduction 29
12.2 Inspection and maintenance activities 30
12.3 Operations and maintenance manuals and training 31

Bibliography 32
