

DIN EN 16932-3:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 3: Vacuum systems

Contents		Page
European foreword		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Symbols and units	7
5	General	8
6	Planning vacuum sewer systems	8
6.1	Basis of design	8
6.2	Location of collection chambers	8
6.3	Route and profile of vacuum pipelines	9
6.4	Hydro pneumatic design of the system	11
6.5	Vacuum station design	13
6.5.1	General	13
6.5.2	Sizing the vacuum vessel for flushing activities	16
6.6	Power consumption	17
7	Collection chambers on vacuum sewer systems	18
7.1	General	18
7.2	Collection chambers	18
7.3	Interface valve units	20
7.4	Explosion safety	20
7.5	Life of membranes and seals	21
8	Vacuum pipelines	21
8.1	Vacuum drain connections	21
8.2	Branch connections	21
8.3	Means of isolation	22
9	Detailed design of vacuum stations	22
9.1	Selection of type of vacuum pumping station	22
9.2	Vacuum vessel	23
9.3	Forwarding equipment	23
9.4	Non-return valves	23
9.5	Vacuum pumps	23
10	Controls, electrical equipment and instrumentation	25
10.1	Collection chamber controls	25
10.1.1	Level sensor	25
10.1.2	Interface valve controller	25
10.1.3	Monitoring of the interface valve	26
10.2	Vacuum station control	26
10.3	Explosion safety	26
11	Installation	27

12	Testing and verification	27
12.1	Collection chambers	27
12.2	Interface valve units	27
12.3	Vacuum pipelines	27
12.4	Commissioning tests	27
13	Operation and maintenance	28
13.1	General	28
13.2	Maintenance	28
13.3	Operation and maintenance manual	28
13.4	Power consumption	29
Annex A (informative) Example of a dimensioning model		30
Annex B (normative) Testing of vacuum sewer system		32
B.1	Testing of interface valve unit	32
B.1.1	Testing requirements	32
B.1.2	Preliminary checks	32
B.1.3	Endurance test	32
B.1.3.1	Test rig description	32
B.1.3.2	Test procedure	32
B.1.4	Resistance to blockage test	33
B.1.5	Submergence test	33
B.2	Testing of pipelines	33
B.2.1	Calibrating test equipment	33
B.2.2	General	34
B.2.3	Interim testing	34
B.2.4	Final testing	34
B.3	Leak testing of collection chambers	34
B.4	Commissioning tests	34
B.4.1	General	34
B.4.2	Noise	34
B.4.3	Minimum vacuum and vacuum recovery time	34
B.4.4	Air/water ratio	35
B.4.5	Operation of vacuum station controls	35
B.4.6	Replacement times	35
