

DIN EN 16932-3:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 3: Vacuum systems

| Contents | | Page |
|-------------------------|--|-------------|
| European foreword | | 4 |
| 1 | Scope | 5 |
| 2 | Normative references | 5 |
| 3 | Terms and definitions | 5 |
| 4 | Symbols and units | 7 |
| 5 | General | 8 |
| 6 | Planning vacuum sewer systems | 8 |
| 6.1 | Basis of design | 8 |
| 6.2 | Location of collection chambers | 8 |
| 6.3 | Route and profile of vacuum pipelines | 9 |
| 6.4 | Hydro pneumatic design of the system | 11 |
| 6.5 | Vacuum station design | 13 |
| 6.5.1 | General | 13 |
| 6.5.2 | Sizing the vacuum vessel for flushing activities | 16 |
| 6.6 | Power consumption | 17 |
| 7 | Collection chambers on vacuum sewer systems | 18 |
| 7.1 | General | 18 |
| 7.2 | Collection chambers | 18 |
| 7.3 | Interface valve units | 20 |
| 7.4 | Explosion safety | 20 |
| 7.5 | Life of membranes and seals | 21 |
| 8 | Vacuum pipelines | 21 |
| 8.1 | Vacuum drain connections | 21 |
| 8.2 | Branch connections | 21 |
| 8.3 | Means of isolation | 22 |
| 9 | Detailed design of vacuum stations | 22 |
| 9.1 | Selection of type of vacuum pumping station | 22 |
| 9.2 | Vacuum vessel | 23 |
| 9.3 | Forwarding equipment | 23 |
| 9.4 | Non-return valves | 23 |
| 9.5 | Vacuum pumps | 23 |
| 10 | Controls, electrical equipment and instrumentation | 25 |
| 10.1 | Collection chamber controls | 25 |
| 10.1.1 | Level sensor | 25 |
| 10.1.2 | Interface valve controller | 25 |
| 10.1.3 | Monitoring of the interface valve | 26 |
| 10.2 | Vacuum station control | 26 |
| 10.3 | Explosion safety | 26 |
| 11 | Installation | 27 |

| | | |
|---|---|----|
| 12 | Testing and verification | 27 |
| 12.1 | Collection chambers | 27 |
| 12.2 | Interface valve units | 27 |
| 12.3 | Vacuum pipelines | 27 |
| 12.4 | Commissioning tests | 27 |
| 13 | Operation and maintenance | 28 |
| 13.1 | General | 28 |
| 13.2 | Maintenance | 28 |
| 13.3 | Operation and maintenance manual | 28 |
| 13.4 | Power consumption | 29 |
| Annex A (informative) Example of a dimensioning model | | 30 |
| Annex B (normative) Testing of vacuum sewer system | | 32 |
| B.1 | Testing of interface valve unit | 32 |
| B.1.1 | Testing requirements | 32 |
| B.1.2 | Preliminary checks | 32 |
| B.1.3 | Endurance test | 32 |
| B.1.3.1 | Test rig description | 32 |
| B.1.3.2 | Test procedure | 32 |
| B.1.4 | Resistance to blockage test | 33 |
| B.1.5 | Submergence test | 33 |
| B.2 | Testing of pipelines | 33 |
| B.2.1 | Calibrating test equipment | 33 |
| B.2.2 | General | 34 |
| B.2.3 | Interim testing | 34 |
| B.2.4 | Final testing | 34 |
| B.3 | Leak testing of collection chambers | 34 |
| B.4 | Commissioning tests | 34 |
| B.4.1 | General | 34 |
| B.4.2 | Noise | 34 |
| B.4.3 | Minimum vacuum and vacuum recovery time | 34 |
| B.4.4 | Air/water ratio | 35 |
| B.4.5 | Operation of vacuum station controls | 35 |
| B.4.6 | Replacement times | 35 |
