

DIN EN 16932-3:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 3: Vacuum systems

Contents		Page
European foreword		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Symbols and units		7
5 General		8
6 Planning vacuum sewer systems		8
6.1 Basis of design		8
6.2 Location of collection chambers		8
6.3 Route and profile of vacuum pipelines		9
6.4 Hydro pneumatic design of the system		11
6.5 Vacuum station design		13
6.5.1 General		13
6.5.2 Sizing the vacuum vessel for flushing activities		16
6.6 Power consumption		17
7 Collection chambers on vacuum sewer systems		18
7.1 General		18
7.2 Collection chambers		18
7.3 Interface valve units		20
7.4 Explosion safety		20
7.5 Life of membranes and seals		21
8 Vacuum pipelines		21
8.1 Vacuum drain connections		21
8.2 Branch connections		21
8.3 Means of isolation		22
9 Detailed design of vacuum stations		22
9.1 Selection of type of vacuum pumping station		22
9.2 Vacuum vessel		23
9.3 Forwarding equipment		23
9.4 Non-return valves		23
9.5 Vacuum pumps		23
10 Controls, electrical equipment and instrumentation		25
10.1 Collection chamber controls		25
10.1.1 Level sensor		25
10.1.2 Interface valve controller		25
10.1.3 Monitoring of the interface valve		26
10.2 Vacuum station control		26
10.3 Explosion safety		26
11 Installation		27

12	Testing and verification	27
12.1	Collection chambers	27
12.2	Interface valve units	27
12.3	Vacuum pipelines	27
12.4	Commissioning tests	27
13	Operation and maintenance	28
13.1	General	28
13.2	Maintenance	28
13.3	Operation and maintenance manual	28
13.4	Power consumption	29
Annex A (informative) Example of a dimensioning model		30
Annex B (normative) Testing of vacuum sewer system		32
B.1	Testing of interface valve unit	32
B.1.1	Testing requirements	32
B.1.2	Preliminary checks	32
B.1.3	Endurance test	32
B.1.3.1	Test rig description	32
B.1.3.2	Test procedure	32
B.1.4	Resistance to blockage test	33
B.1.5	Submergence test	33
B.2	Testing of pipelines	33
B.2.1	Calibrating test equipment	33
B.2.2	General	34
B.2.3	Interim testing	34
B.2.4	Final testing	34
B.3	Leak testing of collection chambers	34
B.4	Commissioning tests	34
B.4.1	General	34
B.4.2	Noise	34
B.4.3	Minimum vacuum and vacuum recovery time	34
B.4.4	Air/water ratio	35
B.4.5	Operation of vacuum station controls	35
B.4.6	Replacement times	35
