Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and units 6

5 Test method 7

6 Apparatus 7

7 Test sample 8
7.1 General 8
7.2 Number 8
7.3 Age 8
7.4 Conditioning 8

8 Procedures and calculations 8
8.1 Test method 8
8.2 Creep rupture test procedure 9

9 Test report 10

Annex A (informative) Test method for determining linear behaviour 12

A.1 Principle 12
A.2 Procedure 12
A.3 Calculations 13

Annex B (normative) Procedure for fitting creep rupture data and determining the LCL strength for a design life of 50 year 14

B.1 Requirements 14
B.2 Principles of the analysis 14
B.3 Analysis Method 15
