Soil quality - Easy laboratory assessments of soil denitrification, a process source of N₂O emissions - Part 2: Assessment of the capacity of soils to reduce N₂O

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and abbreviated terms (except chemicals and reagents)	1
5	Principle	2
6	Materials	2
6.1	Test materials	2
6.2	Apparatus	2
6.3	Reagents	2
7	Procedures	3
7.1	Soil sampling and preparation	3
7.2	Soil slurries incubation	3
7.3	Gas samples analysis	4
8	Control of procedure (optional)	4
9	Data presentation and interpretation	4
10	Test report	4
Annex A (informative) Results obtained on two agricultural soils		6
Annex B (informative) International ring test		8
