ISO 20295:2018 (E)

Soil quality — Determination of perchlorate in soil using ion chromatography

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Interferences

6 Reagents

7 Apparatus

8 Procedure

- 8.1 Pre-treatments
- 8.2 Extraction
- 8.3 Ion chromatography
- 8.3.1 General
- 8.3.2 Calibration
- 8.3.3 Measurement of perchlorate

9 Quality control

- 9.1 Performance of the separator column
- 9.2 Validity check of the calibration function

10 Calculation

11 Expression of results

12 Test report

Annex A (informative) Example of ion chromatography conditions and the selection of extraction method

- A.1 Example of ion chromatography conditions
- A.2 Experimental result for the selection of extraction ratio (soil to water ratio)
- A.3 Experimental results for the selection of extraction method, devices and time

Annex B (informative) Results of interlaboratory validation study

Annex C (informative) Elimination of dissolved sulfate, chloride, hydrogen carbonate, carbonate and metals

Annex D (informative) Determination of perchlorate using inline matrix elimination and applying re-injection analysis

Annex E (informative) Determination of perchlorate using inline matrix elimination and concentration applying two dimensional ion chromatography (2D)
