Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle 6

5 Interferences 6

6 Equipment 7

7 Procedure 8

8 Expression of the results 8

9 Precision 9

10 Test report 10

Annex A (informative) Settling apparatus 11

Annex B (informative) Measurement of settling velocity according to different cases 12

B.1 Measurement of settling velocity by measuring the interface position between supernatant and settled particles 12

B.2 Measurement of settling velocity in absence of interface 13

Annex C (informative) Determination of the theoretical area of the thickener by Talmage and Fitch method 15

Annex D (informative) Results of validation trials for zone settling velocity (ZSV) and Compression point 16
