ISO 20468-1:2018 (E)

Guidelines for performance evaluation of treatment technologies for water reuse systems — Part 1: General

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and list of abbreviated terms

3.1 Terms and definitions
3.2 List of abbreviated terms

4 Concepts of treatment technology for water reuse systems

4.1 General
4.2 Treatment objective
4.3 Treatment technologies used in fit-for-purpose water reuse

5 Principles and general guidelines for performance evaluation

5.1 General
5.2 Performance requirements
5.2.1 Treatment technology functional requirements
5.2.2 Treatment technology non-functional requirements
5.2.3 Characteristics of functional and non-functional requirements in performance evaluation
5.3 Performance evaluation and meeting requirements
5.3.1 General
5.3.2 Monitoring plan
5.4 Application of the guidelines to treatment systems
5.4.1 Treatment system design
5.4.2 Treatment system configuration

6 Functional requirements

6.1 General
6.2 Performance evaluation procedures

7 Non-functional requirements

7.1 Examples of performance indicators
7.2 Evaluation method of environmental performance
7.2.1 Energy consumption
7.2.2 Chemical consumption
7.2.3 Amount of solid and liquid waste generated and requiring disposal
7.2.4 Performance indicators — Integrated considerations
7.3 Evaluation method of economic performance

Annex A (informative) Dependability of treatment technology

A.1 Subsidiary properties of dependability
A.2 Availability
A.3 Reliability
A.4 Analysis and assessment of system dependability

Annex B (informative) Dependability evaluation

B.1 Process reliability to protect public health and safety
B.2 Availability
