ISO 24516-2:2019 (E)

Guidelines for the management of assets of water supply and wastewater systems — Part 2: Waterworks

Contents

	5.8 5.9 5.10 5.11		Inventory update Review of performance information Planning of investigation Performance testing	
6		Asses	ssment	
	6.1 6.2 6.3 6.4 6.5 6.6 6.7 6.8		Process Assessment of hydraulic and drinking water quality performance Assessment of process performance Assessment of structural condition Assessment of operational performance Comparison with performance requirements Identification of unacceptable impacts Identification of causes of performance deficiencies	
7		Plann	ing	
	7.1 7.2 7.3 7.4		General Develop integrated solutions Assess solutions Prepare action plan	
8		Implementation		
	8.1 8.2 8.3 8.4 8.5		Introduction Create/update plan Carry out work Monitor performance Review performance	
9		Operation and maintenance		
	9.1 9.2 9.3		General Operation Maintenance	
10		Rehab	pilitation	
	10.1 10.2 10.2 10.2 10.2 10.3 10.3 10.3	.1 .2 .3 .4 .1	General Strategic plan for rehabilitation of physical infrastructure (long-term planning) General Strategic approaches Determining the need for rehabilitation of physical infrastructure Budgeting Tactical plan for rehabilitation of physical infrastructure (mid-term planning) Risk-based approach to evaluation of priorities Evaluation of individual risks and prioritising for risk control Operational plan — Implementation of rehabilitation measures (short-term planning)	
11		Docur	mentation and performance review	
Annex	Α	(informative) Further information on objectives in the management of assets of waterworks		
Annex	В	(informative) Outline of the content of a drinking water master plan		
Annex	С	(informative) Examples of data relevant to the management of assets of waterworks		
Annex	D	(infor	mative) Risk-based assessment for rehabilitation	
	D.1 D.2 D.3		General Asset failure likelihood estimation by age Asset failure likelihood estimation from information on operation and maintenance
