DIN EN ISO 25177:2020-04 (Englis ch)

Soil quality - Field soil description (ISO 25177:2019)

Contents

Page

European foreword ... **5**

Foreword ... **6**

Introduction ... **8**

1 Scope ... **9**

2 Normative references ... **9**

3 Terms and definitions ... **9**

4 How to use this document ... **10**
4.1 General ... 10
4.2 Combined use with other description standards ... 11
4.3 Mandatory or optional observations ... 12
4.4 Accuracy and units ... 12
4.5 Encoding ... 12

5 Description objectives and methods ... **12**
5.1 General ... 12
5.2 Investigation objectives ... 13
5.3 Quality assurance and quality control ... 13
5.4 Description structure ... 13

6 Description of general references and general information ... **14**
6.1 General ... 14
6.2 Site/profile numbers ... 14
6.3 Location ... 14
6.4 Geographical coordinates ... 14
6.5 Date and time of observations ... 15
6.6 Author and organization ... 15

7 Profile environment ... **15**
7.1 General ... 15
7.2 Previous precipitation ... 15
7.3 Land use at plot level (checked by detailed field survey) ... 15
7.4 Type of cultivation or vegetation or human utilization (at the plot level) ... 16
7.5 Landform of the site ... 16
7.6 Slope length ... 16
7.7 Slope value (gradient) ... 16
7.8 Slope orientation (aspect) ... 17
7.9 Nature of natural and anthropogenic soils and materials ... 17
7.9.1 Natural material ... 17
7.9.2 Anthropogenic material ... 17
7.10 Presence and depth to water table ... 18
7.10.1 General ... 18
7.10.2 Present depth to water table ... 18
7.10.3 Minimum depth to water table ... 18
7.10.4 Maximum depth to water table ... 19
7.10.5 Nature of the water ... 19

8 Surface appearance ... **19**
8.1 General ... 19
8.2 Description of the surface material ... 19
8.3 Percentage of land surface occupied by rock outcrops or surface exposures of “non-natural” material ... 19
8.4 Evidence of erosion ... 20

9 Soil profile description 20
9.1 General 20
9.2 Soil descriptions made or changed after the fieldwork 21
9.3 Soil layer or horizon description method 21
9.4 Horizon or layer number 21
9.5 Horizon or layer depth 21
9.6 Nature of lower horizon boundary 22
9.7 Estimation of moisture status 22
9.8 Colour of the horizon or layer matrix 23
9.8.1 Colour description method 23
9.8.2 Colour description 24
9.9 Mottles 24
9.9.1 General 24
9.9.2 Mottle abundance 24
9.9.3 Mottle colour 25
9.10 Estimated organic matter content 25
9.11 Texture 25
9.11.1 Classification system used 25
9.11.2 Field determination/ estimation of particle sizes 26
9.11.3 Field determination/estimation of the coarseness of a sandy soil 26
9.11.4 Sampling for texture analyses 28
9.11.5 Description of texture diagram 28
9.12 Coarse elements 28
9.12.1 General 28
9.12.2 Coarse element abundance (in % volume fraction) 28
9.12.3 Maximum size of the most frequently observed coarse elements 29
9.12.4 Nature of the coarse element(s) 29
9.12.5 Non-natural or unknown coarse elements 29
9.13 Carbonates and effervescence 29
9.13.1 Intensity of effervescence 29
9.13.2 Location of effervescence 30
9.14 Main categories of soil structure 30
9.15 Compactness 31
9.16 Total estimated porosity 31
9.17 Roots 31
9.17.1 Root abundance 31
9.17.2 Size (diameter) of most frequently observed roots 32
9.18 Density of worm channels 32
9.19 Odour 32
9.20 Field detection of mineral oil in soil samples (oil-water reaction pan) 32
9.20.1 General 32
9.20.2 Oil floating on water 33
9.20.3 Other oil observations 33

10 General designation 33
10.1 General 33
10.2 Type of soil profile classification used 34
10.3 Soil type with reference to the soil classification system used 34
10.4 Type of horizon designation used 34
10.5 Sequence of horizons 34

11 Reporting 34
11.1 General 34
11.2 Presentation of field soil descriptions 35
11.3 Profile diagram 35
11.4 Documented information 35

Annex A (informative) **Landform** **36**
Annex B (informative) **Charts for estimating proportions of mottles, coarse elements, etc.** **37**
Annex C (informative) **Soil horizon designation — Example of the FAO System**[30] **38**
Annex D (informative) **Examples of texture diagrams** **43**
Annex E (informative) **Determination of soil texture in the field** **45**
Annex F (informative) **Some types of soil structure** **48**
Annex G (informative) **List of common elements found in soil and on the soil surface** **50**
Annex H (informative) **Soil description observations to record for specific types of soil investigations** **52**
Annex I (informative) **Example field layer description method** **55**
Bibliography **57**
