

DIN EN ISO 21268-4:2020-09 (E)

Soil quality - Leaching procedures for subsequent chemical and ecotoxicological testing of soil and soil-like materials - Part 4: Influence of pH on leaching with initial acid/base addition (ISO 21268-4:2019)

Contents		Page
European foreword		3
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	7
4	Principle	8
5	Reagents	9
6	Apparatus	9
7	Sample pretreatment	11
7.1	Preparation of laboratory sample and specification of particle size	11
7.2	Preparation of test sample	11
7.3	Determination of the dry matter content and of water content	11
7.4	Preparation of the test portion	12
8	Procedure	12
8.1	Contact time	12
8.2	pH-range	12
8.3	Leaching test	13
8.3.1	General	13
8.3.2	Preparation of leachants	13
8.3.3	Leaching step	14
8.3.4	Liquid/solid separation step	15
8.4	Natural pH	16
8.5	Further preparation of the eluate for analysis	16
8.6	Blank test	16
9	Calculation	17
10	Test report	17
11	Analytical determination	18
11.1	General	18
11.2	Blank test information	18
12	Performance characteristics	18
Annex A (informative) Example of a specific liquid-solid separation procedure for soil samples		19
Annex B (informative) Operation and uses of the test — Influence of pH on the leaching behaviour		21
Annex C (informative) Preliminary determination of the acid/base consumption		25
Annex D (informative) Repeatability and reproducibility data		29
Annex E (informative) Calculation of centrifugation duration depending on centrifugation speed and rotor dimensions		33
Bibliography		35
