ISO 4427-1:2019 (E)

Plastics piping systems for water supply and for drainage and sewerage under pressure — Polyethylene (PE) — Part 1: General

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

3.1 Geometrical terms
3.2 Material terms
3.3 Terms related to material characteristics
3.4 Terms related to service conditions
3.5 Terms related to joints

4 Symbols and abbreviated terms

4.1 Symbols
4.2 Abbreviated terms

5 Material

5.1 Material of the component
5.2 Compound
5.2.1 Additives and pigments
5.2.2 Colour
5.3 Physical characteristics of the compound
5.3.1 Characteristics of the compound in the form of granules
5.3.2 Characteristics of the compound in the form of pipe
5.4 Fusion compatibility
5.5 Classification and designation

6 Effects on water quality

Annex A (informative) Pressure reduction coefficient

Annex B (informative) Resistance to rapid crack propagation

B.1 General
B.2 Initiation
B.3 Parameters governing propagation/arrest
B.4 Test methods
